ATWOOD MAKES
95-MILES-MORE
 SURPRISES FARMER, DOGS AND
 DAREFOOT BOY ON FIELD AT
 FORT PLAIN, N. Y.

HAS 200 MILES TO TRAVEL YET
 Wind Delays Him All Day.—One-Half
 of Distance to New York, Aviator
 Will Break World's
 Mark.

Fort Plain, N. Y., Aug. 25.—Another
 remarkable run through the air on
 the airplane flight from St. Louis to
 New York through Harry N. Atwood
 from Buffalo, N. Y., this morning, west of
 the city, near the destination, the
 plane, 1,000 miles from his starting
 point, was delayed 200 miles, from the
 ground of starting west in New York
 State, this time, where he ascended
 at 10:30 a. m. Atwood sailed around
 St. Albans, took a minute later, turned
 the nose of his machine eastward and
 in the twilight, descended into the
 Mohawk valley, alighting in a field
 here at 7:00 p. m. His actual flying
 time was 2 hours and ten minutes and
 was made without stop.

"The air was a dead calm as a
 pool," said Atwood. "Most of the
 day I kept my hands in my pockets
 as if in a hammock."
 Atwood believes he possibly may
 make New York in one more flight,
 but more probably in two, because,
 according to the reports and wind
 currents from Albany down the Hud-
 son river, he may be compelled to
 fly around the state, or else effect
 landings on the water.

Confines of Beating Mark.
 The 21-year-old aviator, who in 1910
 set a new record for a flight of 24
 hours and 56 minutes, is confident he
 will set a new record in a new
 machine and in a new flight. He has
 just 100 miles to go to New York, but
 he has to fly over the field in Europe,
 flying over the top of his flight
 down the Hudson, after he has
 crossed the Atlantic, he will average
 the present record in 10 hours.

From here Atwood has 200 miles to
 go to Albany, which he is capable of
 making in one flight without a stop.
 The 100 miles from Albany to New
 York will require at least one hour for
 the flight. It is expected to cover the
 200 miles to New York in one day. It
 is estimated that he already has
 200 miles to go in the first day of his
 flight. He will start at 10:30 a. m. from
 St. Louis, in one day, over New
 York City and landing within half
 an hour of the public house.

Demonstration at Utica.
 Utica, which he reached in one hour
 and 12 minutes, had a demonstration
 prepared in a hurry. He was already
 in sight before his approach was gen-
 erally known, but visitors were hesi-
 tant to leave their homes that all the
 bells and whistles in town should be
 sounded. In a minute the town was
 in a uproar.

For ten minutes the tin continued.
 It was almost dark when Atwood
 landed at Fort Plain. He landed
 about 7:00 p. m. and then select-
 ing a clear spot on the opposite bank
 of the Mohawk river, alighted in the
 astonishment of a farmer, a half dozen
 and an angry dog and a barefooted boy
 with a wheelbarrow.

"It has been just a day and a night
 since I saw you," said the farmer, who
 was in a state of excitement. "I
 am sure the problem would be solved
 quite as easily as you have done."
 The people who had gathered from
 the crowd in amazement of seeing the
 aviator, he had to be surprised at the
 simplicity of it. Landing on the
 ground at the right angle and half
 minute at a stretch, meanwhile jump-
 ing back in his seat to figure out his
 location from the time table or out his
 pocket.

EXPECT BEATTIE'S ACQUITTAL
 CHANGE OF SENTIMENT NOTICE
 ABLE AS TRIAL RESUMES.

BEATTIE CASE CONDENSED.
 Henry Clay Beattie, Jr., 1923-
 years old.
 He married Louise Wellbourne
 Owen a year ago.
 He is the son of a wealthy mer-
 chant who has allowed him gener-
 ous sums of money.
 Before his marriage young Beat-
 tie had an affair with Beulah Bin-
 ford, a girl only 13 when Beattie
 first met her.

Some months after his marriage
 the Binford girl who had left
 Richmond, returned and again as-
 sumed a place in Beattie's life.
 On the night of July 18, only a
 few weeks after his wife had be-
 come a mother, Mr. and Mrs. Beat-
 tie went for an auto ride on the
 wagonway to the north of the city.
 Two hours later, just before mid-
 night, Beattie returned with his
 wife in his arms, dead. A note
 had been slipped through her hand.
 Beattie, unmoved, said that a
 highwayman on the Midwestern
 road had shot his wife.

Paul Beattie, a cousin, later said
 that he had bought a shotgun and
 had given it to the man on trial, as
 the latter's request.
 Paul Beattie is the chief witness
 at the prosecution.

Cherwell County Courthouse, Va. Aug.
 24.—The jury returned in 10 min-
 utes a verdict of guilty for Henry
 Clay Beattie, Jr., for his life on a
 charge of wife murder were chosen
 here at a brief session of the circuit
 court.
 The jury was composed of 12 men
 and six women in order that four
 men be perpetually discharged by
 the defendant, a brief recess for lunch
 was taken at 1:15 p. m. Of the 12
 men two in the box all but two are
 farmers.

Cherwell County Courthouse, Va. Aug.
 24.—The jury returned in 10 min-
 utes a verdict of guilty for Henry
 Clay Beattie, Jr., for his life on a
 charge of wife murder were chosen
 here at a brief session of the circuit
 court.
 The jury was composed of 12 men
 and six women in order that four
 men be perpetually discharged by
 the defendant, a brief recess for lunch
 was taken at 1:15 p. m. Of the 12
 men two in the box all but two are
 farmers.

Henry Clay Beattie, Sr., father of
 the prisoner, was again at his son's
 side during the day's proceedings.
 Chief witness, the father says little,
 but believes that he will have hard
 to do his best for the electric chair.
 More than 30 witnesses have been sub-
 poenaed by the prosecution, and usually
 thirty by the defense. The common
 wealth will attempt to show that Beattie
 fired the shot which killed her in
 order that he might resume relations
 with the Binford girl. The defense will
 maintain that he did not fire the shot
 and that the prisoner's version
 of his wife's being shot by a bearded
 highwayman is true and that Paul
 Beattie was the man who purchased for
 Henry the gun with which Mrs. Beattie
 was shot, is a near do well and an
 unreliable witness.

Cement Talk No. 2

Portland Cement does not come from Portland, Maine or Portland, Oregon, and it was not first made at either of these places. It is called Portland because it was given this name by the Englishman who first made it. He called it Portland because he thought it resembled certain natural deposits on the Isle of Portland in England. Portland Cement is the fine powder produced by pulverizing the clinker resulting from the burning together of various materials of proper chemical composition. In the case of Universal Portland Cement, these raw materials are blue limestone and pure limestone. There are many kinds of Portland Cement on the market, produced by different manufacturers. Universal Portland Cement is the highest quality Portland Cement. You can always tell it by the name Universal and the blue trade mark printed on each sack. Forty million sacks of Universal are made and used yearly in this country. If you have any more work to do, you will make no mistake by using Universal Portland Cement. Universal Portland Cement is sold by representatives of dealers everywhere. UNIVERSAL PORTLAND CEMENT CO. SECURITY BANK BLDG., MINNEAPOLIS, MINN. ANNUAL OUTPUT 10,000,000 BARRELS

NOT A BRITISH UNIT IN IT

Irishman Would Not for a Minute Allow the Possibility of Such a Thing. George Morley has just returned from an investigation of what coal is costing some of the other cities. He brought this story from Baltimore: An Irishman there imported a coal mine up to the state. He immediately entered the mine for one of the big coal contracts and went around to say a good word for his coal. The man who was letting the contract heard him a woman, and then interrupted with: "That's all right, but how about British thermal units?" The other, being new to the coal business, did not know that coal is rated on according to the British thermal units in tests. "That's that!" he said. "How many British thermal units are there in your coal?" The Irishman blinked his eye and snorted a bit. "British thermal units in it?" he said. "Why, there ain't a wad in it." —St. Louis Post-Dispatch.

WAS IT ABSENT-MINDEDNESS?

Mrs. Nelson—My husband is awfully absent-minded. Mrs. Wilson—In what way? Mrs. Nelson—He went fishing yesterday. When he had finished to throw away the fish and brought home the hat.

A Large Package Of Enjoyment—Post Toasties

Served with cream, milk or fruit—fresh or cooked. Crisp, golden-brown bits of white corn—delicious and wholesome— A flavour that appeals to young and old. "The Memory-lingers" Sold by Grocers. Post Toasties Company, Ltd. 1515 1/2 Ave. N. Minn.

SYNOPSIS.

Count de Rastel, the Italian ambassador at Paris, has been summoned to the city by the king. He is to go to the city to see the king. He is to go to the city to see the king. He is to go to the city to see the king.

CHAPTER XIII.—(Continued.)

"Monsieur," he went on, and there was a tense look in his face. The ambassador of France had disappeared, gone, vanished? We searched the house from the cellar to the servants' quarters, even in the roof, but there was no trace of him. There he usually wore was in the hall, and all his other habits were accounted for. For many moments, Monsieur, that Tuesday was cold, but all his top hats were found in their proper places. It so seems, Monsieur, and repression and while the investigation was going on, the Count de Rastel, who had been told that the ambassador had been seen to get out by either door, and he went without a hat or coat.

"That's all right, but how about British thermal units?" The other, being new to the coal business, did not know that coal is rated on according to the British thermal units in tests. "That's that!" he said. "How many British thermal units are there in your coal?" The Irishman blinked his eye and snorted a bit. "British thermal units in it?" he said. "Why, there ain't a wad in it." —St. Louis Post-Dispatch.

"Oul, Monsieur, Cest— Monsieur Rigolot began excitedly. "I beg pardon, I believe that is correct." "You say him about ten, now say: therefore no one except the stenographer saw him after ten o'clock." "That is also true," he said. "An 'allora'! Let's see! Telegrams? Telephone messages?" "I made inquiries in that direction, Monsieur," was the reply. "I have the words of the stenographer, the end of the stenographer that there were no callers, and the statement of the stenographer that there were no telephone calls or letters conveyed were only four letters for his personal use. He left them at his desk—here they are."

"The letters Monsieur Rigolot had dictated were laid on his desk by the stenographer," Monsieur Rigolot rubbed on his forehead. "In the anxiety and uncertainties following the disappearance they were allowed to remain there overnight. On Wednesday morning, Monsieur Rigolot read them, and he was surprised to find that they were all addressed to him personally. He turned his hatless eyes upon Monsieur Rigolot, and his perturbed face for one instant turned.

"No doubt of it being his signature?" he queried. "Monsieur, Monsieur," the secretary exclaimed emphatically. "You are certain that I have known his signature for years. There is no doubt. The letters were not of a private nature. If you would care to look at the copies of them."

"He ordered the duplicates tentatively," Monsieur Rigolot read them over slowly and unhesitatingly following the disappearance they were allowed to remain there overnight. On Wednesday morning, Monsieur Rigolot read them, and he was surprised to find that they were all addressed to him personally. He turned his hatless eyes upon Monsieur Rigolot, and his perturbed face for one instant turned.

"Of course," anything unusual happen— "Nothing, Monsieur—that is, nothing was seen of him." Mr. Grimm sat silent for a time and then he said: "The man who was seen to get out by either door, and he went without a hat or coat."

"That's all right, but how about British thermal units?" The other, being new to the coal business, did not know that coal is rated on according to the British thermal units in tests. "That's that!" he said. "How many British thermal units are there in your coal?" The Irishman blinked his eye and snorted a bit. "British thermal units in it?" he said. "Why, there ain't a wad in it." —St. Louis Post-Dispatch.

unscrupled, perfectly unscrupled— Mr. Grimm certainly did not expect to see the man who had been seen to get out by either door, and he went without a hat or coat.

"That's all right, but how about British thermal units?" The other, being new to the coal business, did not know that coal is rated on according to the British thermal units in tests. A TYPICAL AMERICAN BEAUTY

New York—Here, at home, we recognize the fact that the "typical American beauty" is a myth, pure and simple; that there is no particular type of face which might stand as an exclusive example of American feminine loveliness.

Now his voice was clearing, and he saw her, a graceful figure, alighted against the soft green of the wall decorations. Her lips were curled in a smile. If she might have been smiling, and her wonderful eyes reflected a gleam of joy, it was a momentary gleam of joy, it was a momentary gleam of joy, it was a momentary gleam of joy.

Miss GARY

Whites in Europe. In London and Paris especially is she encouraged to go abroad and be just as typical as she has been here. She is encouraged to temptation, in this respect, and she—well, it is to laugh. Interesting to foreigners undoubtedly, but to plain, over-day home folks she is merely amusing and a trifle amusing.

However, there are several Americans perfectly at home in England and on the continent who, while foreign and naturally, are altogether pleased to accept this little, the most complimentary which can be bestowed by a European on a woman from the States—are content to retain the simplicity of manner and style which distinguishes their "back home." Mrs. R. H. Gary is one of these. Unquestionably a great beauty, she is the gift of forgetting the fact very often and letting folk discover it for themselves—a faculty possessed by few women—and she continues to retain for her loveliness of face and figure.

Mrs. Gary's grandfather was a Belgian and at one time was wife married to a Frenchman. Her father, a member of her family also descended from the Marchioness von Ebecken of Danzig. She is a particular favorite to exclusive yachting circles here and abroad.

IS EVANGELISM PROFITABLE?

"Bible" Sunday Says It Is, and He Produces \$200,000. Earning Sunday the lesson. Pittsburgh, Pa.—William A. Sunday, grandfather of the Rev. Dr. Sunday, now professional revivalist, has closed the evangelistic season of 1910-11 and is \$76,007.72 to the good as the result. The return for about ten months' work, more than the president of the United States has drawn for the same time.

United States has drawn for the same time. Prof. Sunday's total for 1910-11 was \$76,007.72. The return for about ten months' work, more than the president of the United States has drawn for the same time.

Table with 2 columns: Location and Amount. Includes entries for New York, New Jersey, Pennsylvania, etc.

Message Drifted for Years. Middletown, N. Y.—While fishing in the Wallkill river near Monticomb, Charles Smith of this village found a sealed bottle in the mud. The bottle contained a piece of paper on which was written "Joseph W. Smith, July 12, 1844." The paper was addressed to Mrs. Smith, and she supposed to have been fishing in the river. It was found in the mud of the Wallkill river.

HIS COLOR CHANGED.

Every—But when it comes to love-making Harold is rather green, isn't he? Myrtle—Not now. Myrtle—Indeed! Myrtle—No, he's blue—I reported him last evening.

LAWYER CURED OF ECZEMA

"While attending school at Lebanon, Ohio, in 1882, I became afflicted with eczema, which lasted for about two years. I tried every remedy known to me, but without success. I was in the form of an ointment, and the lower part of my face being inflamed most of the time. There would be a place where the eczema would not be, and wherever the water would touch it would burn, and cause another one to rise. After the blister would open, the place would scab over, but would burn at times. In this way the sores would spread from one place to another, and at last I was almost blind. I was in a very bad way, and I was almost blind. I was in a very bad way, and I was almost blind.

"During all this time of boils and eczema, I doctor'd with the best physicians of this part of the country, but to no avail. Finally I decided to try Cuticura Remedies, which I did taking the Cuticura Ointment to the sores, and using the Cuticura Soap for washing. In a very short time I began to notice improvement, and continued to use the Cuticura Remedies until I was well again, and have not had a recurrence of the trouble since. I am now over twenty years. I have recommended Cuticura Remedies to thousands of people, and have seen the results in them as remedies for skin diseases." (Signed) A. C. Brandon, Attorney-at-Law, Greenville, O., Jan. 17, 1911.

Throughout Cuticura Soap and Ointment are sold everywhere. A sample of each, with 25-page book, will be mailed free on application to "Cuticura," Dept. K, Boston. Faces Included. Howell—He has a weather-beaten face. Powell—Well, the weather beats everything.

LADIES OAK WARD ROBES. The most stylish after using Allen's Robes. They are made of the finest quality of material, and are very comfortable to wear. They are made of the finest quality of material, and are very comfortable to wear. They are made of the finest quality of material, and are very comfortable to wear.

A Customer's Experience. The man in the iron mask explained. "They assured me there were no mosquitoes here," he cried. Cole's Carbolic quickly relieved and cured my itching and burning skin disease. It instantly stopped the pain of my skin, and I was free from the disease. It is a life worth living! I should say that it depends on the liver—Thomas Gold Appleton.

Whitemore's Shoe Polish. It is a life worth living! I should say that it depends on the liver—Thomas Gold Appleton.

INFLAMMATION AND PAIN

Cured by Lydia E. Pinkham's Vegetable Compound.

Oregon, Iowa.—I was troubled for some time with inflammation, pains in my side, sick headaches and nervousness. I had tried so many medicines that I was discouraged and thought I would never get well. My friend told me of Lydia E. Pinkham's Vegetable Compound and I resolved to try it. I have no more pain, my nerves are stronger and I can do my own work. Lydia E. Pinkham's Vegetable Compound cured me after everything else had failed, and I recommend it to other suffering women.

—Mrs. W. S. Scales, 200 W. Howard St., Creston, Iowa.

Thousands of untried and general testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from these distressing ailments need not lose sight of these facts or doubt the efficacy of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham at Lynn, Mass. She will treat your letter as a strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

A DIFFERENCE.

Mrs. Altha.—My husband is making a collection of the contents of a wine.

Mrs. Tuzoo A. Lott.—My husband is making a collection of the contents of a wine.

In St. Charles, Mo. Master Gregory Graham, aged three, had been having an ocean bath, and breaking away from his older sister he ran all dripping wet to the door of the living room, where Mrs. Graham was entertaining a caller from the fashionable hotel.

"Why, dear," his mother greeted him, "you mustn't come in here like that, dear. Go straight upstairs and take off your dripping suit first."

A few minutes later Mrs. Graham turned toward the door in consternation as to what might have sent her visitor's entrance so high, and to the same instant her son's cheerful voice rang out:

"I took it off, mother, like you told me to. I'm coming in now for some cake."

GET POWER.

The Supply Comes From Food.

If we get power from food why not strive to get all the power we can. That is, only possible by use of skillfully selected food that exactly fits the requirements of the body.

Poor fuel makes a poor fire and a poor fire is not a good steam producer. From not knowing how to select the right food to fit my needs, I suffered grievously for a long time from stomach troubles. I was cured by a little town in Missouri.

"It seemed as if I would never be able to find out the sort of food that was best for me. I had everything that I could eat would stay on my stomach. Every attempt gave me heartburn and filled my stomach with gas. I got thinner and thinner until I literally became a living skeleton, and in time was compelled to keep to my bed."

A few months ago I was persuaded to try Grape-Nuts food, and it had such good effect from the very beginning that I have kept up on it ever since. I was surprised at the ease with which I digested it. It proved to be just what I needed.

All my unpleasant symptoms, the heartburn, the inflated feeling which gave me so much pain, disappeared. My weight gradually increased from 88 to 115 pounds. My appetite returned, my strength ran back, and I am once again able to run my household and enjoy my Grape-Nuts food. It is furnished by Postum Co.,ATTLE CREEK, MICH.

A few days' trial will show anyone how it is about food.

Read the little book "The Road to Well-being" in pages "There's a Reason."

Covered from the inside. They are granular, free, and full of human energy.

TORNADO HAVOC

SEVEN DEATHS REPORTED

Score at Antler Believed to Be Injured—Loran, Mohall, Selvis and McClusky Hit—Property Damage Heavy.

Nobell.—Tornadoes originating at four different points northwest of this city, killed two people, a young man and a girl, and caused several thousands of dollars worth of property damage. The storm traveled east. A dozen or more of farm buildings were demolished and several persons are reported injured.

Minot.—A terrific storm swept over Northwest North Dakota, killing several people and devastating property and placing the lives of many people in jeopardy. A child was killed and several plowmen injured near Antler. The plowmen were enjoying an outing at a grove just out of town. The plowmen were picked up in the air and landed hundreds of feet away in all directions.

According to the best information obtainable twenty-four persons were seriously injured. Telegraph and telegraph lines were badly injured. A report of commission and direct information is not to be held.

All of the physicians and surgeons from Minot have been rushed there from Antler since the storm swept south and a trifle to the west, where it again raged to the north, uprooting trees and doing untold damage at McClusky. Three people are reported dead there in a collapsed building.

MANY SOUTHERNERS FILE

SPECIAL TRAINS CARRY HUNDREDS OF HOMESEEKERS.

Registration Affidavits Will Be Drawn From High-Filled Platforms.

Minot.—That the Fort Berthold land opening is attracting attention here is amplified by the fact that almost daily chartered automobiles with anxious land seekers are arriving in Minot, the headquarters of registration. Special cars have arrived from Iowa and Nebraska during the past few days with homeseekers.

Among these delegations have been many representative men of the communities from which they came. Some of them have been extensive farmers and others have represented the laboring element.

A notable feature of the registration is the large number of former Americans from Alberta and Saskatchewan who are declaring their intention to again become citizens of the United States and are registering for a chance in the land lottery. Many of these want to locate several years ago and have been unsuccessful and are now returning to make this their permanent home. Thirty-seven came in on one train from the north.

Judge James W. Wilton announced that any person over the age of sixteen years who possesses good intelligence may act as an agent for an applicant. The belief has been prevalent that it was necessary for a party to be eligible to make homesteaded entry of a tract, but this was an erroneous idea. It is a perceptible fact that practically every land seeker from Kansas has had an affidavit for an affidavit written to the post office and also to the Commercial club to know whether or not they could secure an agent for them, and as a result, practically all of the men and women of the city of Minot have been solicited in relation to a veteran. The soldier must make affidavit to the effect that the name of his unit was written in the blank before he swore to the affidavit and that makes it necessary to search the archives before the papers are mailed from Minot.

It is an absolute fact that the majority of the land seekers who come here to be admitted to the reservation until they have an opportunity to see the promised land, as the reservation is being staked. About twenty automobiles have been used in the past few days from the land seekers to and from the reservation. The post card dealers have done a thriving business since the registration began, and Postmaster Mrs. J. M. Murphy has added three extra clerks to the stamp department to facilitate matters at the postoffice.

Several months' hours have been kept since the registration began, but all night service will be inaugurated the last week with the big rush in, as the land seekers' interest is naturally attracted to the manager in which the drawing will be conducted. At previous drawings a huge cylinder was used, in which the names of the applicants have been placed and the morning of the drawing thoroughly mixed by revolving the large cylinder. The names of the winners have been placed in a box and taken out by a committee of the public and walk into the office of the postmaster, and he will announce the name as drawing No. 1.

WINSHIP BELLED BY J. D. DASON

Grand Forks Herald and Times.

Grand Forks.—Over his signature in a personal notice that appeared in the Grand Forks Herald Tuesday morning, George H. Winship announced the purchase of the newspaper plant and building by a syndicate of business men, many of whom are residents of Grand Forks.

The syndicate was organized by J. D. Dason. The new company will consolidate the business departments and plants of the two institutions, continuing the publication of the two papers from the plant of the Grand Forks Herald.

Announcement of the plans and purposes to be followed in the future will come more appropriately from the new management, said Mr. Winship in his editorial, "but I am convinced that every effort will be made to strengthen the news features of both papers, and to develop to the utmost the plant and equipment of the manufacturing and commercial lines, and that while a policy uncompromisingly Republican will be followed, all parties and factions will be given fair treatment and a fair hearing."

New Dean of Medicine.

Grand Forks, N. D., Feb. 10.—Dr. E. French, professor of anatomy at the University of North Dakota, has been elected dean of the college of medicine of the University of North Dakota, will succeed Prof. C. H. Henshaw as that position. He later has been promoted to dean of the college of health.

SCENE OF SUCCESS

Where Grant Received His Commission as General.

City—Lindsay Cabin Headquarters Where He Planned Campaign Which Won Promotions and Started Grant Career.

Ironton, Mo.—Of all the events of the Civil war that are being recalled in the half-century anniversary review of interest, few are of more general interest than the story of Gen. U. S. Grant receiving his commission as Brigadier-General on Missouri soil. A movement has been started to purchase the site at Ironton of the delivery of this commission for a national park.

The campaign which Gen. Grant planned at the cabin which brought him advancement from Brigadier-General to Major General and was the first beginning of his career as a victorious commander.

A graduate of West Point, who had served in the Mexican war, Grant had left the army because he could not support his family on his salary. He tried farming near St. Louis, became a real estate agent without much financial success, and moved his family to Galena, Ill., where he became a clerk in his father's leather store.

At the outbreak of the Civil war he entered a company organized at Galena and accompanied them to Springfield, when it was sworn in and incorporated into a regiment.

Gen. Grant's first military experience as a soldier was as a sergeant of state troops to report to the government, and when President Lincoln issued the second call for volunteers Grant was sent to Milton to assist in the regiment of which he became colonel.

He has confessed that he was not confident of the outcome of his first battles, but he found his opposing officer had less confidence and had retreated before Grant and his men arrived. Grant said that the memory of that incident always gave him courage in the most desperate fighting or when in the thick of the fighting.

August 3, Grant arrived with his regiment at Ironton, to relieve Col. H. Grant Irons, who later became governor of Missouri and who was a vice-presidential candidate in 1872.

Grant, 3, President Lincoln signed the commission of Brigadier-General Grant, and this fact was telegraphed from Washington to Ironton. Grant was camped near a spring on the banks of the river, and he received word that the Irons had been captured and the Lindsay cabin became the headquarters of Gen. Grant, although he spent a large part of his time sitting at an old pine table in the shade of a oak tree in the yard working out plans for a campaign. It was while sitting in the shade of the now historic Grant oak that he received word by mail, August 14, the commission of which had been notified by telegraph, August 30, Grant took leave of his regiment on the river-campaign, which was his promotion to major general of volunteers in February, 1862. His later achievements are history.

The Grant headquarters premises have been known for many years as "Emerson Park" the late John W. Emerson having purchased the property and erected a fine brick residence on the site of the log house. In 1890 the surviving members of Gen. Grant's regiment erected a statue of a Federal soldier to mark the spot where he received his commission.

The property now owned by J. E. York, who maintains it as his residence, but a movement has been started to have the government purchase the site, which is situated at Fort Davidson, 2 miles away, as headquarters.

No wonder. "Where your kisses are busy about!" "He's been out of work six weeks!" "I should think that would suit him!" "That's it! He's just got a job!"

A man may like a girl all the more because she seems to like him less.

W. G. Clark went to Richard-
ton Thursday on business.

Mrs. Otto Christenson of Sims
died Wednesday of this week and
was laid to rest in the cemetery at
that place on Friday afternoon.

Hurvey Courtman and wife
of Rochelle, Iowa, arrived in this
city Friday for an extended visit
at the W. D. Wagoner home south
of town.

Protest.
"I beg pardon," said the new arrival,
but it seems to me it's excessively
warm here.
"What?" scouted Susan. "Evidently
you forget where you are. This
place is meant to be warm."
"Oh, so - but there's such a thing
as overdressing it," said the Catholic Stand-
ard and Times.

STRIKE COSTS TOILERS \$45,000.

Union Carpenters' Bank at Work in
Minneapolis.
Minneapolis, Aug. 24.-Arel Soder-
berg, financial secretary of local No. 7
of the Carpenters' Union, says that
the fifteen week strike which was
brought to an end last week cost the
union about \$45,000 in strike benefits
paid to the idle men. More than \$13,
000 was collected from the 2,000 mem-
bers of the union on extra assess-
ments.

The Almont Arena
Almont, North Dakota.

ALMONT NEWS NOTES

Gleaned from Here, There and Everywhere.
By the Arena-Gate-Keeper.

Everybody reads the Arena, why don't you subscribe.

Anna Timmerman, of Sims, visited her parents in this city Sunday.

J. W. Hurley was a New Salem visitor between trains Wednesday.

Louis Larson transacted business at New Salem on last Saturday.

We understand that Louis Larson has resigned as butter maker with the local creamery.

Miss Ruth Sherwood arrived in Mandan from Minneapolis on Saturday.

L. C. Clark, brother of W. C. arrived in the city on Wednesday with a crowd of land seekers.

The first load of 1911 grain was hauled into Almont Wednesday of this week and sold for \$1.10 per bushel.

Mrs. Albert Anderson took No. 8 Wednesday morning bound for Mandan where she will visit for a few days.

Win Sherwood transacted business at New Salem on Tuesday of this week, returning the same day on No. 7.

Miss Ruth Sherwood left Friday for Mandan where she will meet two of her lady friends who will return with her for a week's visit here.

Carl Sherwood who has been the Arena "devil" for the past six months, resigned the first part of this week, "but the mill still grinds".

Louis Keller, who resides on Rocky Ridge last his new \$5,000 residence by fire on Monday of this week. The origin of the fire is still a mystery.

Geo. Held who resides east of town, was in Wednesday and purchased lumber and building material for a new house. Circumstances look suspicious.

Cornelius Knutson has been out at his mine during the past few weeks assisting in the digging of coal. They commenced shipping the first part of this week.

Mrs. I. E. Miller and son, Frederick, and daughter, Edythe, of Underwood, N. Dak., have been visiting at the Dr. Cain home during the past two weeks.

N. E. Becklund returned Wednesday evening via Sims from a two days visit at various points in Minneapolis. He reports the crop as looking fine all along the way home.

Miss Myrtle Rick, who has been visiting at the home of her sister, Mrs. L. L. Stoerkel, during the past few months, departed Wednesday for her home at Billings, Mont.

Mrs. I. E. Miller and children visited at Glen Ullen Tuesday of this week. They left for their home at Underwood Friday, after a most enjoyable two weeks visit with Dr. and Mrs. Cain.

M. S. Levy arrived in the city Wednesday from Seattle and left the same day for Lark where he will build a restaurant and store. Mrs. Levy and baby and sister arrived last week.

Mrs. Andrew Larson and son, Arnold, who have been visiting at the L. Nelson home during the past few weeks, returned to their home at Chicago on Friday of this week after a most enjoyable visit.

N. S. Becklund, O. W. Erickson, Andrew Larson, J. R. Sherwood, C. E. Berglund, Dr. W. T. Cain and L. J. Stoerkel made application to the United States for 100 acres of land in the Fort Berthold reservation at Bemont on Saturday last.

Ladies Form Club.

The ladies of this city assembled at the G. H. Anderson home on Wednesday afternoon of this week and formed what will be called the "Kensington Club." Mrs. Ray L. Lindner was elected president and Mrs. G. H. Anderson secretary and treasurer.

The club is to meet at one of the member's house and the ladies will do embroidery work during the session. They will meet every two weeks at the homes of the different members running alphabetically from A to Z and as one of the rules is not to serve more than three dainty eatables at any of the meetings the gentlemen are warned not to be looking around for a "square" at any of the meetings.

All members not attending the meetings will be fined and these fines will be saved for one year and at the end of that period the ladies will give a picnic at which the husbands will be invited. Long live the Kensington Club is the watchword. The next meeting will be held at the home of Mrs. C. E. Berglund on Wednesday afternoon, Sept. 6th.

H. C. Bird left for Elgin, Friday on business matters.

Revenue Collector Johnson was in Almont Thursday.

Daisy Thompson, of Sims visited in this city Thursday.

Amund Johnson purchased a new corn binder the first of the week from J. Nelson & Son.

The Mandan Fair.

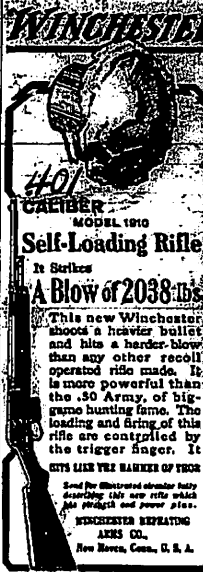

The Missouri Slope Agriculture and Fair Association's Fair at Mandan September 12-15, this year promises to far exceed any heretofore given by our neighbors across the river. All attractions this year will be new ones and seen only at the big state fairs as each foreign attraction has been secured only by the quick work of this organization and the payment of the price therefore dared to attempt to pay. Their races this year will nearly be double in number and each prize is much larger than any they have offered before. There will be at least two more harness races, two running races each day besides the farmer's race, chariot race, and some fancy riding on educated horses.

The racing feature alone will be well worth going miles to see, but that portion is only a starter, for prizes as premiums which will be given for all classes of agricultural and live stock displays will not be equaled even by the state fair. The farmers and stockmen of the whole Missouri Slope certainly have a large incentive for raising and showing only the best grain and stock as this feature will be the most interesting portion of the fair every year from this year on.

The Indians will all be there again this year in far greater numbers than any previous year, and their dances, etc., will prove as interesting as they have always been in the past even to old timers.

The services of the peerless little Curtiss aviator, "Lucky" Bob St. Henry who has made so many thrilling and spectacular flights over this state have been secured to make three flights each day of the fair and those who saw him in Mandan last June will remember this during the flight. Big game and wild animal acts will be heavily featured and those who have seen them will testify that he has earned.

LAKE LAND LAND! Buyers and traders will do well to see us before dealing elsewhere as these are our sort of proposition you want. M. V. Bitgum, Steele, N. D.

WINCHESTER
40 CALIBER
MODEL 1910
Self-Loading Rifle
It Strikes
A Blow of 2038 lbs.
This new Winchester shoots a heavier bullet and hits a harder blow than any other recoil operated rifle made. It is more powerful than the .30 Army, of big game hunting fame. The loading and firing of this rifle are controlled by the trigger finger. It **SHOTS LIKE THE BARREL OF TIGER**

CHURCH NOTICE.

For Sunday Aug. 27, 1911
Sabbath School at 10:00 a. m.
Evening Service at 8:00 p. m.
Subject: Matt XXIII:37.
A service will also be held (H. V.) at the Week's school house on Sunday at 3:30 o'clock p. m.
N. B.—As these services are now drawing to an end, your help and attendance is earnestly and cordially invited.—COME!
Services will be held in the hall.
A. T. Bradford, pastor.

Schools Show Big Gains.

County Superintendent W. F. Lott has just received the complete returns from the school census for Morton county and from the figures it will be found that the increase in the school population for the past year is 523, and in the city of Mandan 59.

In 1910 the school population of the county was 6091, and for Mandan was 861. In 1911 the county was 7,214, and Mandan was 922, very few counties in the eastern part of the state will show the increase which Morton has enjoyed during the past year.—Mandan Republican.

Notice of Application for Dissolution.

(STATE OF NORTH DAKOTA.)
County of Morton.
IN DISTRICT COURT,
TWELFTH JUDICIAL DISTRICT.

In the matter of the application of the FIRST STATE BANK of the village of Almont, Morton County, North Dakota, for voluntary dissolution.

Notice is hereby given—that the First State Bank, of Almont, North Dakota, a banking corporation under the laws of the State of North Dakota, has filed with the District Court of Twelfth Judicial District, in the County of Morton and State of North Dakota, a voluntary application for dissolution as provided by the laws of said state and said application for dissolution has been approved and ordered filed by the judge of said District Court. All persons having objections to the allowance of said application for dissolution are hereby notified to file them with this court before the expiration of thirty days from the date of the first publication of this notice.

Dated at Mandan, North Dakota, this 14th day of August, 1911.

Ed Morek,
Clerk of Court, Morton County,
N. D. TWELFTH JUDICIAL DISTRICT.

Transporting Produce to Market

PRIMITIVE MODE OF GOING TO MARKET

ON THE WAY TO MARKET IN DAILE

His marketing of his produce is obviously one of the responsibilities of the American farmer and in the present days, more so than in the days of the grandfathers, is the problem of transporting the produce to market. It is not a simple matter to prove something of a problem. To the outsider it might appear simple enough if he does not take into consideration the numerous factors that have bearing in the matter. For one thing, there is the weather, which must always be taken into account in planning a trip to market with produce, even though the farmer is to make over good roads. Then again, the produce to be transported may be fragile, such as eggs, or perishable, as, for instance, the products of berries and fresh fruits. And finally there is the necessity of taking into account probable market conditions at the prospective destination, for, presumably produce will sell more readily on "market days" than on "off days."

Despite the complications that seem inevitable there are a surprising number of American farmers who still persist in the practice of marketing their produce directly to the consumer. Indeed, in some localities it seems to actually be increasing rather than diminishing. This is all the more remarkable when one reflects upon the facilities that are now afforded the farmer for marketing his produce at his own door. Agents of commission merchants and many of the dealers in the large cities traverse rural routes, regularly, buying for spot cash, eggs, vegetables, etc., and to such a point have their facilities improved that the farmer who prefers may sell his berry crop on the vines and his produce of peaches or apples on the trees leading to the "other fellow" not only all the worries of transportation, but the bother of picking and packing and, incidentally, the loss from waste.

At the same time there is no certainty that the farmer who elects to market his own produce has the best of the bargain. He is very likely to have his farm located near any good-sized town or city and if he is engaged in diversified farming or trucking. Of course the man who is farming on a big scale and depending himself to a specialty, be it fruit or celery or nuts or grain, has the best of the town by the wagonload and dispose of it at first hand to the hungry housewife. All the same it is not a simple matter to follow the same basic principle that are the wise ones for the farmer desirous of selling to the best advantage the varied products of a small farm.

All the directions of the marketing—be it operating on a large or small scale—have learned in recent years that it means added profit and reduced losses if they can adopt the principle of selling as near as possible to the ultimate consumer. Obviously, of course, they cut out the middleman's profit and better yet, they are enabled to produce many of the losses in perishable products which are caused by such controversy between commission merchants and farmers. Finally, by marketing direct, the farmer gets the full benefit of the price for the quality of his products and this is a most important asset for the man who expects to continue in the same vocation year after year. Indeed, building on the foundation of quality and prompt delivery he may build up a circle of patrons of his own that will render him independent of everything because they will stand ready year after year for the better product of his own and take it, too, at prices higher than rate for the regular run of similar produce in the open market.

THE NEW WAY OF BRINGING FARM PRODUCTS TO MARKET

A MODERN MARKET

SELLING IN SAN FRANCISCO, CAL. - A CHINESE MARKET

For the selling end of the business in this fashion, this task is delegated to his wife, his son or his daughter, particularly in the case of the young people do through periodical visits act to in a large place in their lives. There are hardships to be sure, not the least of them suggested by the fact that usually the trip to market must begin ere daylight in order to reach the city in time to catch the trade of the earliest market, but the farmer folk who have acquired the habit of trucking in this way are invariably loath to give it up. Many a farmer, too, has had his reputation during the progress of the caravans of produce, which are now being hauled to more isolated sections of the country there are many odd specialties incident to the transportation of produce to market. In some localities where animals are yet in use the quiet, slow-moving teams are employed to carry the produce, and in the south one may see donkeys, mules and all manner of unorthodox conveyances. It is the thrill of the foot-fixer. Just here it may be noted that the old-fashioned colored folk of the south take as naturally to the conduct of portable market stands as a fish does to water. In a kindly climate such as in their most of the staple vegetables

the American people for food commodities to purchase from is an influence felt indirectly in the transportation of farm products. From the point of view of the farmer, the most important of mind brings him directly to market in trays, boxes and crates, but lately there has been a tendency to provide standard size baskets for apples, peaches, tomatoes, etc. in the old days the consumer who purchased less than a barrel of apples or potatoes did not receive them in an "original package" bearing the grower's statement as to quantity and quality, but all this is being changed owing to prevailing market conditions—added and abetted by growers who are eager to establish a reputation for their brand of produce.

Eggs are another commodity which will bring increased prices all the year round if furnished in a discriminating container. The dilemma of the cold storage egg is such that persons who are keen for fresh fresh eggs are in many instances willing to pay an advance of 50 to 100 per cent over the prevailing market figure for eggs that can be depended upon. Poultry raisers have not been slow to take advantage of this and instead of the large crates made familiar by cold storage methods we now find the fancy-printed "guaranteed" eggs put up by the dozen in boxes of wood or pasteboard, each box being closed by a seal which insures that its contents have not been tampered with.

PASTIMES OF THE PAST

It has not been so very long ago—middle aged mothers and fathers of today will recall the happy, happy times in the game of grass hoops was in fashion. Indeed, it was quite the thing, though that plastic hoop it must be said enthusiasm for out-of-door amusements as far as the dear little children were concerned, was the thrilling pastime. "Hickety" was the name of the game, and it was never bettered by the ball or pleasure's modus vivendi. If there was anything the young lady of the household was more in the charge of being a "hooper." No, no, she was never loath to give up her position, and her pretty little were framed on beams and pruned to the proper tucker for hilarious enjoyment. The Indianapolis News says: "Maister wain a clever little book called 'The Whirlery of Archery,' and with a surprisingly short time young men and maidens joined in archery clubs, were playing away with blue arrows at targets as big as round as cream cheese boxes of that day. Though these maidens did women frequently went wide of the target, not so Cupid who was there with his bow and a full complement of arrows. He shot center nearly every time,

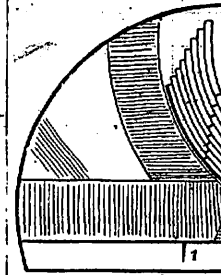

WHAT THE PLOW DOES

Tool for Pulverizing Soil and for Burying Trash.

Illustration Shows Graphically How Implements Perform Its Duty—Must Be Done When Land Is in Proper Condition.

By W. O. PATTERSON, Agricultural Editor, North Dakota Agricultural College.

The plow is a tool for pulverizing the soil and for burying trash. The illustration shows graphically how the plow pulverizes the soil as it passes up onto the moldboard, in this drawing the soil is represented in layers with a pin of soft material curved the soil, as the soil slides under the moldboard the layers

Principle of Pulverizing Action of Plow.

KEYNOTE TO TREE GROWING

Success Depends Upon Furnishing Conditions Required for Making Growth—Few Trees on Plains.

By W. O. PATTERSON, Agricultural Editor, North Dakota Agricultural College.

Success in tree growing depends upon furnishing the tree the conditions which are required for making growth. It means supplying soil, air, light and water, and it means spreading its branches and unfolding the leaves; temperature it gets by the air, and the water and air and light are not so easily secured by trees on the prairie, which is the reason that there are so few trees on the western plains.

When man assists the tree it grows rapidly and thrives. The main thing to be done is to supply the moisture needed, and this can be brought about by simply keeping the grass and weeds from growing over the tree roots; for their roots are nearer the surface than the tree's, consequently they have the first chance at the moisture. The result in this unfair competition is that the tree suffers.

Individual trees are brought about by simply keeping the grass and weeds from growing over the tree roots; for their roots are nearer the surface than the tree's, consequently they have the first chance at the moisture. The result in this unfair competition is that the tree suffers.

POULTRY NOTES

Cleanliness in feeding will guard against diseases to which poultry are liable.

Keep the dust box supplied with nice clean dust, and see that the grit box is never empty.

A \$10 rooster is generally cheaper than a \$200 hen. The good blood will tell the second year.

eggs being added on each other, the upper one moving the most. This same thing can be represented with a book. Take hold of the inside page and lift-up-on-a corner. Notice how the leaves slide on each other. As the soil moves upward on the moldboard the pulverizing action takes place in a different position, and as the soil leaves the moldboard it is again pulverized.

In case the soil is dry it breaks up into lumps and the pulverizing action does not take place. In fact, plowing the soil when dry is about like kneading the flour instead of the dough, and any woman can tell how what lumps are never formed. If ladies pay so much attention to the proper time to knead the dough and to baking, then why should not the men pay as much attention to having the soil in the right condition for plowing so as to get the pulverizing action of the plow, which is the thing that would be sought.

Cleanliness in feeding will guard against diseases to which poultry are liable. Keep the dust box supplied with nice clean dust, and see that the grit box is never empty.

A \$10 rooster is generally cheaper than a \$200 hen. The good blood will tell the second year. In case the soil is dry it breaks up into lumps and the pulverizing action does not take place.

Order shell is absolutely the best all-arounding food for the hens. Keep it before them constantly. Keeping many breeds in a poor way to succeed. Get down to one or two varieties and give them the best of care.

Duck eggs do not hatch as well as they used to be because of the weather. The best place for the world for the poultry yard is the orchard—any kind of an orchard where insects abound.

The poultry raiser who has a lot to keep his poultry healthy should keep them from worms, lice and other parasites. Order fresh ground feed as a constant for supplying the poultry with the best possible food.

The picking of live geese for the live roasts, so called, is a frigid long and hard job. It is a most tedious and difficult job.

Low temperature in the brooder is a most serious matter. It is a most tedious and difficult job. It is a most tedious and difficult job.

Low temperature in the brooder is a most serious matter. It is a most tedious and difficult job. It is a most tedious and difficult job.

LOOSEN A WAGON WHEEL

Loosening Wagon Wheel Nut. The nut and them fit a short piece of iron to the screw handle and to one of the spokes. Push the wagon back a few feet and the turning wheel will loosen the nut. The nut can be loosened in the same manner by pushing the wagon forward.

INSURING!
