## Losses from Poor Management and Poorly Done Farm Work.

### A Retrospective View May Help Us to Avoid the Pitfalls of the Past in Our Future Efforts.

Sometimes we get a lot of good stacks of barley for \$100! The work of hauling to the stack is no worse than hauling to the machine. The threshers will thresh it much quicker from the stack than from the shock. If you get a shower of rain while the machine is there they will start up again as soon as the rain is over if they are threshing from the stack. If from the shock you have them to feed for a day longer until the shocks dry out.

Six cents a bushel on 1000 bushels of wheat means \$60 loss. And there will be that much loss on practically every bushel of wheat that stands in the shock until this article reaches you.

### Good Shocks or Poor Shocks

But even if you did not stack, have you noticed the condition of the shocks that twisted over, or the bundles that dropped to the ground? There is some of that grain sprouted, isn't there? And it will be threshed with the shocks that stood up well, all will be mixed together and when it reaches the market the buyer will find some of those sprouted kernels. The result will be the grain will sell probably as rejected or no grade, when nature this year gave you No. 1.

Nine times out of ten our loss or failure to succeed is owing to one of two things: we either made mistakes or did not do our work well enough or in the right way.

### First Mistake.

We say first because it is probably 1 of the most recent. How many of our readers have had their crop injured while standing in the shock waiting for the threshing machine to get around to them? If it had been well stacked the grain would have improved in quality at least one grade, while it has lost a grade because of the fact that we have had what we so much want in this country, plenty of rain. If there is one thing more than another that the people of the Dakota Farmer territory are anxious for, it is rain. And now this fall when we have had it the farmers have lost millions of dollars in the value of their crop because they have not done their work as it should always be done.

### Winter Fodder.

What quality of hay have you fed this winter and next spring? There has been a great deal of complaint that the hay is poor or worse, and that the feeders are not getting any more out of it. But so many of our farmers have not and can't be sure of it, unless they comment on the hay they buy they had out. Then I trained them the hay was not so good as it is. And they found out the time and some of the money they had spent on it.

### And Why?

The big farmer will say: "I cannot stack all of the grain I raise. I cannot get help to do it, or cannot afford to pay the wages that help demands."

If you cannot afford to take care of a big crop after nature has given it to you there is something wrong some where. You are either trying to do too much, or you are not managing your work right. No farmer on earth can afford to lose from six to ten cents a bushel on his wheat and from ten to twenty cents on his barley simply because he did not stack it.

### What Does It Mean?

On 1000 bushels of barley it means from \$100 to \$200. Five good stacks—not big ones—were all that were necessary to protect it. And if it were a good, pure, 6 rowed barley, you would easily get 20 cents more for it if it had been stacked than you will if it has stood in the shock until the first of September or later.

Can't you afford to build five

# A CHECK TO RHEUMATISM

Dr. Williams' Pink Pills Build Up the Blood and Overcome the Rheumatic Poisons.

Rheumatism defies any treatment that does not build up and purify the blood. The poisons of rheumatism are in the blood and only through the blood that the disease can be fought successfully.

When the blood is weak and impure, rheumatism cannot get a foothold. When it does the thin and impure blood is not strong enough to overcome the poisons alone. It must be strengthened and purified. Dr. Williams' Pink Pills for Pale People are the best blood-building medicine you can take. They make new blood with every dose and promptly check further progress of the disease. They make the blood so pure and strong that you feel the least trace of rheumatism return.

Mr. A. Hamann, a farmer on B. F. E. McArthur's farm, writes: "I had Dr. Williams' Pink Pills for Pale People for rheumatism and rheumatoid from which I suffered for over six years. As the attacks came on every spring I think they were caused by impure blood. My joints were stiff and always very sore in my arms, hands and knees and especially in my arms, when I had been working hard and working hard. The pains were so severe that I could hardly sleep at night. I used liniments of various kinds, but didn't do more than drive the pain to some other part of the body and I did not get any relief from the doctor's medicine."

"When I read about Dr. Williams' Pink Pills for Pale People in our weekly paper I made up my mind to try the medicine that had actually cured some one else. A few boxes cured me and I think so much of the pills that I keep them in the house to use as a tonic. My wife finds them strengthening and I think the pills are the best medicine for the blood."

Dr. Williams' Pink Pills for Pale People are the blood's greatest aid in overcoming rheumatism, headaches, neuralgia, chronic, and other effects of the grip and flu.

A valuable booklet, "Diagnosis of the Blood," will be sent upon request. Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box by mail, to Dr. J. C. Williams, Medicine Co., Brockton, N. Y. Adr.

The Case. "How did it happen that Joppa did not keep the good position he had?" "On one important occasion he lost his head." "How did that happen?" "It was cut off."

DR. J. H. RINDLAUB (Specialist), Eye, Ear, Nose and Throat, Fargo, N. D.

Where ignorance is bliss it is folly to cultivate the acquaintance of a chap that knows it all.

Win's Wonderful Remedy for Children, which, besides the usual, restores the system, also purifies the blood, and is a natural cure.

A woman's henchies are natural; a man's are usually acquired.

## SUFFERED EVERYTHING

For Fourteen Years, Restored To Health by Lydia E. Pinkham's Vegetable Compound.

Elgin, Ill.—"After fourteen years of suffering everything from female complaint, I am at last restored to health. My doctor advised me to take Dr. Williams' Pink Pills for Pale People, and I have been cured."

continued illness until I was made well. — Mrs. Henry Lewis, Adams St., Kearneyville, W. Va. "I feel it my duty to write and say what Lydia E. Pinkham's Vegetable Compound has done for me, suffered from female weakness and at times felt so miserable I could hardly endure being on my feet. "After taking Lydia E. Pinkham's Vegetable Compound following your special directions, my trouble is gone. Words fail to express my thankfulness. I recommend yours to all my friends." — Mrs. G. B. Warrington. The above are only two of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which show clearly what great things Lydia E. Pinkham's Vegetable Compound does for those who suffer from female ailments. If you want special advice write to Lydia E. Pinkham Medicine Co. (Incorporated) Lynn, Mass. Your letter will be promptly read and answered by a woman and held in strict confidence.

For Backache Rheumatism Kidneys and Bladder.

# NORTH DAKOTA NEWS

## LEG BALLY TORN.

Catches in the Belt of a Thrashing Machine.

Wilton.—A sad accident nearly costing the life of a thrasher of Wilton. He had gone out with a thrashing machine to thrash the crop in the field of Dr. A. F. Elliott, southwest of town, and was working with the work around the separator.

The drive belt on his blower fan had slipped off the wheel and was running over the shaft and belt. He made an attempt to push the belt back on the wheel with his foot when the belt snaked around his leg and to a point where it was caught up and whirled by the swiftly moving belt. By quick action the machine was stopped, the belt cut and he was freed from the belt and was in the hospital.

When picked up he was in great agony and it was noticed that his leg was badly twisted and out of shape. He was hurried to the hospital in an ambulance and the aid of physicians summoned. Upon examination it was found that the limb had been torn apart at the knee joint, the bone displaced and the lower part of the leg buckled with the thigh. The skin, flesh and ligaments were torn into shreds and the probability of saving the leg from amputation seemed small.

Dr. McQueen from Langdon was called, and a consultation held with the local doctors as to what was the best procedure. It was decided that there was a chance of saving the limb and work was commenced immediately to treat and dress the horribly injured member. During this time the patient endured terrible pain.

## NEW ASSESSMENT PLAN.

System Gives People Chance to Place Valuation.

Minot.—City Assessor H. H. Wheeler will use an entirely new plan in the assessing of the valuation of city property for taxation next year. The details of the new plan are being worked out now and the modification of the advance system used in Paulding, Chicago, Cleveland, Houston and other large cities.

Hereafter the work of valuation is the responsibility of the valuation of city assessor. The new plan will entirely eliminate this feature instead of going from house to house and the advance system used in Paulding, Chicago, Cleveland, Houston and other large cities.

Hereafter the work of valuation is the responsibility of the valuation of city assessor. The new plan will entirely eliminate this feature instead of going from house to house and the advance system used in Paulding, Chicago, Cleveland, Houston and other large cities.

## GRAY IS CHAIRMAN.

N. D. Republican Committee Fills Vacancies on Electoral Ticket.

Jamestown.—George M. Gray, of Kenmare, was elected chairman of the Republican central committee, succeeding Frank Romberg, who resigned at a meeting held here. Mr. Gray is an attorney and will assume active charge of campaign plans. The committee named W. H. Anderson, of Devils Lake, O. J. Soller, of Jamestown, A. P. Paulsen, of Valley City, and George J. Stone, of North Dakota, as executive committee members. The committee named W. H. Anderson, of Devils Lake, O. J. Soller, of Jamestown, A. P. Paulsen, of Valley City, and George J. Stone, of North Dakota, as executive committee members.

Grain Being Haid. Devils Lake.—Thrashing rize over the last region resumed activity Thursday after a week's delay on account of rainfall. With harvesting completed, with the exception of late crops, farmers will have an opportunity to thresh everything possible during the next ten days. While the yield of oats and barley has been heavy, the price of these crops have not tended to food the market with grain. In fact, the reverse is true. Every bushel on the farms is being pressed into service as a granary.

Man Dies of Shot Wounds. Fargo.—John S. Johnson, a resident of Columbus is dead as a result of a slight wound received while hunting. Johnson was accidentally discharged and several shot around one of his hips.

Impetus to Farm Management. Fargo.—An impetus to the study of farm management in North Dakota will be given by the appointment of a special agent of the federal department of agriculture to carry on the work in the state. Cal Hensle, recently in charge of similar work in Nebraska and Michigan, will have charge of the branch. Advice will be given regarding farm capital and necessary farm machinery. The new system has been tried with success in several other states.

## MURDER-OF NEGRO.

Dispute Over Card Game Results, a Killing at Sganland.

Revels.—The murder of a 25-year-old Keweenaw, is a case of a dispute over a card game. The killing happened during a poker game in a saloon at Sganland. The victim was a Negro named McQueen and the murderer was a white man named McQueen.

A party of thrashers gathered in a grove alongside the railroad track here yesterday, and engaged in a poker game. When the dispute arose, the white man named McQueen was captured after a chase of about two miles.

The murderer was a white man named McQueen. He was captured after a chase of about two miles. The victim was a Negro named McQueen.

## A HIDDEN TREASURE.

Concealed Under Elevator and Almost Lost.

Lawton.—While at his elevator Sunday P. J. Whelan noticed a man probing into the dirt on the driveway. When questioned he began to deny, but he was caught in a trap. A hidden treasure was found under the elevator.

The man was caught in a trap. A hidden treasure was found under the elevator. The man was caught in a trap.

## FRUIT GROWING IN N. D.

Orchards Now Commercially Profitable Industry.

Rebush.—Prominent among those who have taken a leading part in raising fruit in this locality is Martin Jacobs, who in this year harvesting the first crop from the fruit trees set out on his farm just north of town a few years since. Mr. Jacobs has a number of the fruit trees, including crab apples, and some fine plums and cherries. The apples are of a good size and are of delicious flavor.

Across the road from the Jacobs place on the farm of J. F. Zuber, the apple, crab apple, plum and cherry trees are bearing nicely this year, and this year, south of town, a fine crop of excellent crab apples and plums from several thriving trees.

## GOVERNMENT EXPERT.

Hensle Will Spread New Farming Gospel in North Dakota.

Fargo.—Farm management work in North Dakota has received an impetus from the federal government by the appointment of Cal Hensle by the department of agriculture to head a special department. The headquarters will be at the North Dakota agricultural college where Mr. Hensle will establish his office, but the work will be carried on throughout the state. It is planned to send men versed in farm management to show the farmers on their own ground. The rotation of crops, methods of planting and plowing, division of crops and diversified farming will be some of the subjects urged upon the farmers.

Mr. Hensle is a graduate of the North Dakota Agricultural college and has recently been in charge of farm management work in Wisconsin and Michigan.

Still Another Delay. Grand Forks.—Another soaking rain fell over Northern North Dakota and Northwestern Minnesota Friday, again delaying thrashing operations and making more serious the condition of the crops. The crops are being damaged by excessive moisture during the thrashing season. If the last rain had not fallen, the crops would have been about three or four days ahead. The great amount of rain has caused much damage to grain in short. The sprouting of grain is one of the bad features resulting.

### A HIDDEN DANGER

It is a duty of the kidneys to rid the body of all acids, an irritating poison that is constantly forming inside.

When the kidneys fail, uric acid causes rheumatism, headache, dizziness, gravel, urinary troubles, weak eyes, dropsy or heart disease.

Doan's Kidney Pills help the kidneys to get rid of uric acid—bringing new strength to weak kidneys and relief from backache and urinary ills.

Mr. James Crooks, First St., W. V., writes: "I was afflicted with kidney troubles. One day while in a hurry, I took a powder which I found in the store. This was immediate relief. My kidneys were cured and I was able to do my work again."

Get Doan's at Any Drug Store, Or Buy Doan's Kidney Pills from **DOAN'S KIDNEY PILLS**, POSTER-KIMMEL CO., Buffalo, New York.

Mr. Louis Coyne—Lord De Hroke, your new son-in-law, has a mind of a head for business.

Mr. Dustin Gray—You wouldn't say that if you knew the bargain he drove with me.

### CAREFUL DOCTOR

Prescribed Change of Food Instead of Drugs.

It takes considerable courage for a doctor to deliberately prescribe only food for a despairing patient, instead of resorting to the usual list of medicines.

There are some truly scientific physicians among the present generation who recognize and treat conditions as they are and should be treated, regardless of the ailments at their pockets. Here's an instance:

"Four years ago I was taken with severe gastritis and nothing would stay on my stomach, so that I was on the verge of starvation.

"I heard of a doctor who had a summer cottage near me—a specialist from N. Y.—and as a last hope, sent for him.

"After he examined me carefully he advised me to try a small quantity of Grape-Nuts at first, then as my stomach became stronger to eat more.

"I kept at it and gradually got so I could eat anything I pleased. I could eat and digest three times as much as I had before. My limbs got stronger and I could walk. He is steadily recovered.

"Now after a year on Grape-Nuts I weigh 155 lbs. My people were surprised at the way I grew fleshy and strong on this food. Name given by Postum Co., Battle Creek, Mich. Read the little book, 'The Road to Well-being,' in 10c.

"Here's a reason."

"Ever read the above letter? A man once appeared from me to claim. They were all true. All Druggists, or Send For, Det.

### MACHINE WILL NEVER DISPLACE THE HORSE

No Fear of These Animals Being Supplanted.

Of course there is no doubt that the self-driven vehicles have put into the domain of horse-drawn work the motor has not yet displaced the horse entirely, and never will. For mere locomotion, especially if done in a hurry, a power-driven vehicle is best to use, provided the road is good.

If one is not in a great hurry, or if the road is rough, the horse will be better than the auto. But there is nothing in the nature of a personal equation to attach you to a machine, while nearly all owners of horses, certainly the kindly human ones, have a real feeling for their horses, in some cases amounting to strong affection. I have owned many cars, beginning during my boyhood, and ever since. And some of them were so human, so friendly, and so evidently appreciative of friendly attention, that, in some cases I have had almost the feeling that they are members of the family. I have not been able to get up to something like the auto says a writer in the Farm Progress.

Of course I can get from one place to another rapidly provided the road is good, with the auto; but if the

Will it cost less to run a machine than to feed horses? Will the machine stand so much work as the horse?

Is there any collateral gain in value, as in the case when manure are used as fuel and also used as fertilizer? And, what is the value of the manure which the horse produces and of very high quality, they averaged in selling price at four years, a hundred and fifty dollars each? It is doubtful if a machine costing many times the value of the horse could have been of as much real worth to the owner as the old mare was, and I doubt very much whether the auto could have rendered service so long.

But the question of replacing horse-drawn vehicles and implements by power implements is more than that the mere utility of the method. So long as crops have to be grown, so long as manure will be blown up, so long as the soil is to be enriched, so long as the soil can be so that as well when there is no live stock on the farm to produce manure.

Or, can we possibly maintain the soil when year after year crops are taken off if we do not have live stock to consume the surplus and make manure? And, can we possibly devise any implement that will be adapted to use for all sorts of farm crops? We may use tractors on a power tractor with a gang of plows, and also do the harrowing the same way; but can we cultivate crops of corn, tobacco and all the other farm crops if we have no power that can follow the use of the plow and the harrow and follow the curves of the furrows that conform to the lay of the land on rolling ground?

### Excellent Farm Type.

road is bad the horse has a distinct advantage over the power-driven vehicle. Of course all roads should be made good and better, and a very important result of the general use of the power-driven vehicles will be the great improvement in building and maintaining permanent roads.

So the old legs follow who stick to the horse will, of course, derive material benefit from the fact that so many good roads are coming into use. But the number of machine vehicles is going to increase all the time, and some sort of plan is going to be made out that will enable the power-driven vehicles and implements also, to become far more general.

There are, without question, some strong indications to the effect that vehicles wherever they can be used, and it may be that in time methods of cultivation may be modified in such a way that almost all work done by horse power can be done by the machine. But will it be economical?

Excelsior Farm Type.

### OVERCOAT OF FAT HIDES HOG FAULTS

### Some Breeders Have Trick of Sending Over-Fat Boars to Market.

(By H. O. WEATHERSTONE.)

Some breeders have a trick of sending their best boars to fairs with an overcoat of fat which hides many defects. When you see an over-fat boar it is time to become wary.

It is a well-known fact that all the best breeding animals at the big fairs are sold fat and the rough ones are left to the last.

It takes a good judge to pick out a good, strong, healthy boar if he is over-fat.

Even if the animal is quite thin in the middle of the season, he will be so drawback when men of experience are making selections, because they judge the animal on his points and not on his general sleek, round appearance.

Another point to be observed in buying boars is to observe closely the shape of his head, a boar with a long, narrow head, ears set close in, is, as a rule, a poor sire.

Keep the young stock growing. They are tried during the heated spells as much as the human race and any extra attention given the young will mean profit. Many promising chicks are killed during the first few days for lack of attention and never realize what has been lost, causing a source of loss.

### DISLOGGING BEDBUGS FROM HEN HOUSES

### Remove All Roosts and Nests and Spray With Hot White-Wash.

Many poultry houses are infested with bedbugs, and it is not an easy matter to dislodge them.

Some people say that turning the hen house upside down will dislodge the bugs to attack the sheep, where they will be lost in the wood. This is a good idea, but it will not remove all the roosts and nests from the house and spray with boiling hot white-wash which has been added a pint of turpentine to a gallon.

Another good remedy is to burn the interior of the house with kerosene mixtures, which can be bought at drug stores. Another effective remedy is to half a pint of each of turpentine, camphor and kerosene, to which add about four ounces of gum camphor. If more is needed double the quantity. Apply with a brush.

The nests should be turned out over a blazing fire, and the roosts should also be held over the fire and if should be thoroughly whitewashed and painted before putting them back.

### Old Apple Tree.

The largest and oldest fruit tree in the state of Washington is claimed to be the famous Fraser apple tree in the orchard of C. H. Fraser, about 100 years old. It is said to have been bearing for 60 years and it yields approximately three tons of fruit every year.

### GOES BACK TO YEAR 1716

Oldest House in Berks County.

had been considered by the King of Sweden, a drastic order to that but his war with the Germans and his subsequent sudden death delayed and nearly ended the project.

As part of the celebration of the centennial of the organization of the old Sweden (Gloria Dei) church, which is now embraced in Philadelphia, under the leadership of Andrew Hudson, made an exploration of the oldest house in Berks County, Pa., which was built in 1716 for the purpose of establishing an inland trading post with the Indians. They found suitable land several miles north of the Manassas creek, where William Penn, the new proprietor of Pennsylvania, granted them 10,000 acres.

The old house above mentioned was built by Isaac Jones, who has one of the largest tracts of cultivated land in the county on the east bank of the Schuylkill, hedges on all sides by large trees. A road crossing the two highways on either side of the river now leads directly to front of it, from which the old date stone in the upper part of the wall is easily detachable. The building is now used as the headquarters of a boat club.

### His Trust is in the Bible

Kaiser Declares He Solves All Questions, Even of a Political Nature, by the Scriptures.

Paris, France.—Rene Pauze, the military expert of the Temps, who is now in Germany, has declared that the emperor during the recent maneuvers of the Swiss army, quotes the Bible as a guiding principle in his conduct.

"Your army goes in the 'army camp'."

The emperor in conversation constantly insisted upon the necessity of understanding as the best means of disarming the enemy and of reaching the goal of his military policy. On one occasion, in a conversation with the German general, he said: "I have read the Bible and I have found that the best way to win is to be just and to be true."

"I don't know how to win," he said, "but I know that the best way to win is to be just and to be true."

In a conversation with the German general, he said: "I have read the Bible and I have found that the best way to win is to be just and to be true."

"I don't know how to win," he said, "but I know that the best way to win is to be just and to be true."

### SOME REASONS WHY ACHIEVEMENTS FOR WHICH MR. TAFT DESERVED TO BE GIVEN ANOTHER TERM.

### GOOD THINGS HE HAS DONE

Consistently Has Carried Out Policies of His Administration.

Shown Himself to Be a Disposer of Rare Constructive Ability.

Here are twenty reasons why William Howard Taft should be given another term as president:

1. Because he has been and is consistently carrying out the policies of the predecessor.

2. Because as president, he has carried out the most constructive work since his predecessor's term.

3. Because he has shown himself to be a disposer of rare constructive ability.

4. Because his administration has been successful in carrying out the most important economic policies of the country.

5. Because his administration has shown itself to be a disposer of rare constructive ability.

6. Because his administration has shown itself to be a disposer of rare constructive ability.

7. Because his administration has shown itself to be a disposer of rare constructive ability.

8. Because his administration has shown itself to be a disposer of rare constructive ability.

9. Because his administration has shown itself to be a disposer of rare constructive ability.

10. Because his administration has shown itself to be a disposer of rare constructive ability.

11. Because his administration has shown itself to be a disposer of rare constructive ability.

12. Because his administration has shown itself to be a disposer of rare constructive ability.

13. Because his administration has shown itself to be a disposer of rare constructive ability.

14. Because his administration has shown itself to be a disposer of rare constructive ability.

15. Because his administration has shown itself to be a disposer of rare constructive ability.

16. Because his administration has shown itself to be a disposer of rare constructive ability.

17. Because his administration has shown itself to be a disposer of rare constructive ability.

18. Because his administration has shown itself to be a disposer of rare constructive ability.

19. Because his administration has shown itself to be a disposer of rare constructive ability.

20. Because his administration has shown itself to be a disposer of rare constructive ability.

### Price is Right.

Roses are 15 cents a dozen in midwinter in Seattle. The cost of the roses here is not nearly more than 25 cents. But railway travel for most districts costs nearly four cents a mile.

Their Endless Wrangle.

The Doctor—Natural endowment goes a great way, I grant you, but it takes education to make a man of parts. The Professor—Oh, yes, but money will do it quicker.

Twins in Common Suffering.

Darwin has recorded a French case of two twin brothers, one living in Paris and the other in Vienna, who were educated by rheumatic physicians at the same moment. Each was certain, when consulting a specialist, that he was suffering from a like complaint; and mentioned the fact. Subsequent letters confirmed this.

Old Egyptian Well Pausing.

The ancient Egyptian well pausing at the entrance of the Nile, they employed a system of water-lifting devices, known as the 'saqiya', which was used to lift water from the Nile to the fields. The principal part of the saqiya was a large wheel, which was turned by a water buffalo. The water was lifted from the Nile to the fields, and then used for irrigation.

Allegation.

Allegation is a word which is used to describe a charge or accusation. It is often used in a negative sense, as in the case of the 'saqiya' mentioned above.
