## Barn Burns at Bethel

### Three Horses, Harness, Stack of Hay and Two Saddles Lost. Origin Not Known.

Fire the origin of which is unknown, destroyed the barn and contents and a large haystack on Rev. Mr. Storm's farm at Bethel, Friday afternoon, August 8, causing a loss of \$1600.

About four o'clock Mrs. Storm and daughter who were the only ones at home, noticed smoke rising from the roof of the barn. Both hastened to the barn to get out the two horses and a colt tied in the stable and succeeded in leading one horse out, but Mrs. Storm's clothing being on fire and while putting out this blaze the horse frightened at the flames, ran into the stable to its mate and perished. Beside the

three animals lost a large stack of two set of heavy work harness, one set buggy harness, and two saddles and a number of small tools.

The loss which was total and no insurance, we have been informed, falls heavy upon Mr. Storm and family as the last few weeks' hay crop is swept away with the horses necessary to do the work.

The only theory that has been advanced as the probable cause of fire, is that a glass might have so reflected the sun's rays as to give them a common focal center and so set fire to the stack of hay.

## Exciting Run-away Saturday

Saturday afternoon, while driving at a rate that would shatter all speed regulations, Martin Wohlmann attempted to turn northward at the post office corner and succeeded beyond his most ardent expectations—the horses turned, the buggy turned over, the driver turned on the ground, the horses turned the buggy into a job for the blacksmith, and then the crowd turned out to note the comedy-like turn the attempt to show-off had taken. The buggy was a total wreck.

After the series of turns had been made the horses broke loose and after running southward a little way, stopped and began eating. The pieces of wreckage were collected and delivered to the Blacksmith to be repaired.

### Will Give A Dance.

There will be a big dance at Jonas Olin's big barn on Saturday evening, August 23. Everybody invited—and all who know Jonas knows there is a good time coming the night of the dance.

### Bought Classy Pianos.

John and Oscar Olin have recently purchased high grade classy new upright George W. Gesta pianos of C. B. Nilson of New Salem.

## E. E. Templeton Resigns P. O.

After seven years as post master, giving excellent service during the entire time, has resigned his position to take effect at once in order to devote his time to other business. Uncle Sam is losing an able assistant. The notices for an examination for a successor has been given out to take place Sept. 13, at Mandan. At present there are three are four candidates for the office. They are O. C. Ellingson, A. Timmerman, J. R. Sherwood and C. E. Kelsven.

## Resisted Uncle Sam's Officer.

United States Marshal James Shea brought Gustave Falk of Glen Ullin, to Almont and took him before U. S. Commissioner G. H. Anderson for a hearing on the charge of resisting a federal officer. Waiving a hearing the case was set for the 20th, when the defendant is to appear for trial in the commissioner's court.

### Church Service August 17.

Sunday evening Rev. S. Walker will conduct divine service in the schoolhouse in Almont. Service begins at eight o'clock. All are invited to come.

## Returned from Montana.

Mrs. Angus Gillis returned to Almont, Thursday evening on No. 6 from a few weeks' visit to her daughter Margaret, at Great Falls, Montana. While away Mrs. Gillis suffered considerably from acute pulmonary trouble induced by the rarified atmosphere.

## Mandan Mercantile Auditor Here.

Thursday afternoon Auditor H. Phening of the Mandan Mercantile company, made his monthly inspection of the local yards and office and found everything in excellent condition. An outline of a vigorous campaign for fall business was laid out and considerable advertising space will be devoted to telling the people of the many offers the company will make.

## Dr. Henderson Here Tuesdays.

Dr. A. O. Henderson, the chiropractor, will be in Almont, every Tuesday until further notice, at the hotel. He will arrive in Almont sometime during the morning and stay all day and evening. Consultation and examination free at his room in hotel. No matter what your sickness or ailment, consult the Chiropractor. Main office Mandan. Advt.

## U. S. Marshal James Shea Here.

Jim Shea, the U. S. Marshal while in Almont on business for Uncle Sam, spent an hour or two under our roof reminiscing—and the latchstring will always be out to 'Jim' whenever he hits this part of the country.

## De Soto Creamery Man Here.

Mr. Le Appel of the De Soto Creamery and Produce Co., Minneapolis, spent a few hours in this place Friday morning looking after company business. While here he made the Arena office a pleasant visit, after which he left for Bismarck on No. 8.

## Mandan Visitors.

Mr. and Mrs. E. E. Templeton motored to Sims Friday morning and took the train from that place to go to Bismarck and Mandan.

## Motored to New Salem.

Thursday evening, Peter Nelson and Melvin Larson in a Metz, and N. E. Becklund, G. H. Anderson, G. G. Chamberlain and the scribe in an R.M.F. enjoyed a motor trip to New Salem, in the cooling night and all felt a great amount of relief in riding in the breeze after suffering from the intense heat of the wind during the day.

## Went to Garrison.

Jesse Milton spent two days at Garrison, N. D., looking after some business matters. He stated on his return that the tornado reported to have done so much damage, was not nearly so bad as press dispatches at first indicated. A few roofs were damaged by the wind and some localities the rain fell in torrents smogging grain in the fields and in stack.

## A Growing Industry

### Is The Hess Creamery Company of Glen Ullin.—A Steady Upward Trend Given Dairying.

"What an artistic building, that is" said deputy U. S. Marshal Haggart as he stood looking at the plant of the Hess Creamery Co., and, from all I can hear, it is one of the most up-to-date and sanitary creameries in the entire northwest, or in any part of the country."

The remarks were made by the marshal in the presence of the writer, as he was about to go into the country south of Glen Ullin, on a mission for the government.

Desiring to know more about the Hess Creamery Co. and its plant, we went to the place at the close of a busy day, when, if at any time the place would not appear so well-kept and clean as other times. Mr. Hess who was busily engaged in making ice cream, called an assistant to take his place at ice cream making, and then we began an inspection of the plant where the popular and known the States over FERNWOOD brand of butter is made. We found in every department the greatest care taken to keep the place as clean, odorless and sanitary as is possible and absolutely necessary to produce only the highest class butter as this creamery turns out. We also noted each of the employes takes a personal pride in maintaining his department so that it does not fall below the standard of any other.

This system works for the best and highest quality of the product, and it is commonly remarked among commission merchants 'Fernwood Butter sells itself'.

To give the reader a general idea of the course the cream takes from its receipt at the door until it is placed on the market in air-tight, paraffin paper wrapped one pound packages, it will be necessary to start at the receiving platform. As the cream is delivered, it is weighed, tested and graded and then poured into the receiving vats. Here it is kept till enough has accumulated to begin pasteurizing the cream. The process of pasteurizing cream is so interesting that it is here given in detail. The pasteurizer is a machine about the size of a barrel containing two concentric tanks so crowned and sealed that the cream and water cannot mix. Inside the inner tank is a centrifugal fan. As the cream is pumped from the receiving vat it is heated to 160 to 170 degrees Fahrenheit. At this temperature it is forced by the fan from the pasteurizer over cooling tubes into the cooling vats where the cream is cooled to 70 by means of hollow coils & discs thru which ice cold water is pumped. The temperature is kept still lower until 52 degrees and here it is kept as that is deemed best for ripening the cream.

At this point a slight digestion may be permitted. While the previously described process has been going on the buttermaker has prepared a culture consisting of two ounces of Lactic acid germs in one pint of milk. This culture is left standing for 24 hours until the milk coagulates thoroughly. The culture is then placed in 30 gallons of milk which has been sterilized at 212 degrees Fahrenheit. It is during this part of the work that extreme care must be taken to keep foreign substances from the milk. The culture is mixed with and aids in an even ripening of the cream thus giving the butter that uniform quality and and flavor for which Fernwood brand is noted. And to make a note of it this is the only pasteurizer used in North Dakota thereby placing the Hess Creamery ahead of all others as an up-to-date establishment.

Having gone over each step of the process, Mr. Hess called attention to the battery of churns of 400 gallons each which are run at the rate of 30 revolutions per minute. Before placing the cream in the churn the ripening cream which has stood at 62 degrees, is brought still lower until 55 degrees has been attained. Then gravity connections are opened and cream runs into the churn and here is made a 1000 pounds of butter in each churn. And such butter—golden, finely flavored, high quality butter.

Before removing the butter from the rotary combined churn and worker the butter milk is drawn off, salt put in and the churn set in motion at 5 to 7 revolutions per minute until the butter is uniformly worked and salted. The next step shown was the cutting and wrapping the finished product. This was interesting to watch as the machines formed, and cut 75 one pound bricks of butter at one operation of the pure non-corroding aluminum stamp. So soon as the golden cubes leave the stamp they are immediately wrapped in paraffin paper put in cold storage or shipped out to fill the many advance orders for this well-known product.

The by-products of this modern factory cut an important figure in course of a year's business. The chief of these are the popular Polar ice cream and Hess's Celebrated Lac-Topic Buttermilk. The Polar ice cream which has an extensive sale in the ice cream parlors along the main line of the N. P., is made in a wholesome sanitary way because it can not come in contact with any foreign matter from the time the ingredients are put into the non-corrosive german silver machine with a capacity of 200 gallons per hour, until it is taken from the sterilized repository by the very same machine as the other comes of delivery and refreshing ice cream. Recent demands has made it necessary to double the capacity of the machine.—Continue page 8.

# WHAT IS THE ANSWER

QUESTIONS ANSWERED BY MEMBERS OF THE NORTH DAKOTA AGRICULTURAL COLLEGE FACULTY.

**Q.—Will it pay to "measure" in North Dakota farming?**  
**Answer—**R. C. Donagub, professor of agronomy.  
 In a 15-year trial with farm manure at the North Dakota experiment station manure increased the yield of wheat following corn & wheat has been applied 1 1/2 bushels the first year, 2 1/2 bushels the second year, and nearly 4 bushels the third year. The total increase for the three years was over 8 bushels. Each load of manure was worth \$1.60 per acre and the present price of farm products. When applied to millet in rotation with wheat each load was worth \$1.65.

**Q.—Does pasteurizing milk kill the bacteria?**  
**Answer—**O. L. Martin, professor of dairying.  
 Pasteurization of milk for about 30 minutes at 145 degrees Fahr. will kill a great many of the bacteria, yet some of the spores or seeds are not destroyed until a boiling temperature is reached. However, pasteurization at the above temperature is an excellent safeguard against the most common disease bacteria like typhoid, diphtheria and scarlet fever.

**Q.—What variety of wheat is best for North Dakota?**  
**Answer—**W. R. Porter, superintendent North Dakota demonstration farms.

There is no best variety for all soils and seasons. Blue Stem is probably the best variety for the southern half of the Red river valley. Both Blue Stem and Scotch Fife do well in the northern half of the Red river valley. Fife seems to do best in the Devils Lake region and north to the boundary line. In the western part of the state, Fife, Blue Stem and Macaroni wheats all seem to be doing well.

**Q.—Is grit necessary for laying hens?**  
**Answer—**O. W. Dynes, poultry investigations.  
 As necessary as teeth are to man.

**Q.—What hereditary diseases are most common in stallions?**  
**Answer—**G. H. Critchfield, secretary stallion registration board.  
 In this state we have found that sidebones were the most prevalent of all undewinesses while spavins and curbs were the cause of a great many rejections at sale.

## WATCH THE BUTTER MARKET

Not Difficult to Change Freshening Time of Cows to Get Big Yield When Prices Are High.

By G. L. MARTIN, Professor of Dairying, North Dakota Agricultural College.  
 The variation in the average price of butter on the leading markets is a good indicator for dairymen to watch. The prevailing prices quoted during the year are governed largely by the supply and the demand. Invariably the price of butter falls in the springtime when the majority of farmers allow the cows to come fresh and are turned to the pasture. The price as surely rises as the weather warms and the pastures begin to dry up, and reaches the high water mark in the winter time.

The federal crop reporter for 1912 shows the average price of New York butter in January to be 27 cents and it kept on decreasing till April, where it reached 22 cents—the lowest point for the year. For the next five months it remained nearly at a standstill. On September 1st it was back where it started. During the next three months it began to climb rapidly to 31 cents for October, 34 cents for November and 31 cents for December. The two extremes being April and December with a difference in price of 15 cents per pound of butter.

The reasons prices begin to rise in the fall is due largely to the fact that the majority of farmers allow their cows to freshen in the spring and produce the heaviest flow. In the summer and fall the cows fall off in flow, creameries close down and the butter supply is inadequate. The marketing and of the dairy business is something that will repay every farmer to investigate. It is not a difficult matter to change the freshening time in the cows. If they freshen in the fall, the heaviest milk flow will come when the prices are high. The cow will then be milked during the winter and be ready to dry off in the summer when butter prices are low. Winter dairying is coming to be more popular every year for people are beginning to see that a

difference of 15 cents a pound for butter is worth working for, to say nothing of the other factors in favor of milking the cows in the winter.

## LIGHT REQUIRED BY TREES

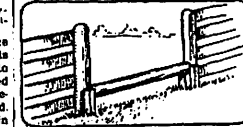

Many Varieties Need Certain Amount When Seedlings, But Do Not Thrive When They Are Older.

(By NORMAN M. ROSS.)  
 Trees are divided into two classes by foresters according to the amount of light required by them in order to make healthy growth. These are known as light-demanders and shade-bearers, some are more shade-tolerant than others, that is, they will grow under the shade of other trees, and in fact many varieties require a certain amount of shade when seedlings, but cannot live under the same shade when they are a few years older. There can be no hard and fast line drawn between these two classes, as the one merges very gradually into the other. In the group of trees generally classed as shade-bearers, some are more shade-tolerant than others, and the same is the case with the light-demanders, some requiring more light than others. The white and black spruce are instances of heavy shade-bearing trees, that is, they will continue to grow under very dense shade. The birch and green ash are samples of light-demanders. The ash-leaved maple and elm will bear a fair degree of shade, but require plenty of light for their best development. As a rule, light-demanding trees will never be set out in pure plantation, for reasons already given, unless it is intended that after a few years the trees should be under-planted with some other variety capable of maintaining soil cover. Shade enduring varieties may be satisfactorily planted without mixture so far as keeping the soil in good condition is concerned. There are other considerations, however, which might make it advisable always to set trees in mixture in preference to pure plantations. Insect and fungus attacks because as a rule each particular insect and fungus has a preference for a certain variety of plant or tree, and unless extraordinary conditions exist do not care to attack other varieties. A mixed plantation of rapid and slow growers or light-demanding and shade-bearing trees will, in most cases, give a larger continuous return per acre and per annum than one made up of only a single variety.

## GATEWAY FUND CONVENIENT

Cattle May Be Run Into Hog Pasture for Water When It is Desired to Keep Swine In.

Very often it is necessary to let cattle into a hog pasture in order to avoid the same time it is not desirable to let the hogs go into the cow pasture. This can be accomplished by means of a roller placed in the gateway or in a panel of the fence, says the Iowa Homestead. This is made by taking two 2x2 pieces, four

Convenient Gateway.

feet long, and sunk in the ground next to a post after a hole is bored through, near the top for the roller to work in. Then get a round pole or post about five or six inches in diameter, cut to fit in the gateway and fasten it by putting a half-inch iron bolt in each end of the roller. If this is put on the side of the fence next to the hog pasture the gate can be closed when necessary and it will keep the hogs out when opened.

**Thinning Peaches.**  
 There is only one way to properly thin peaches, and that is by hand. Get the best results, the fruit should be spaced from four to six inches apart.

**Pear Blight.**  
 Pear-blight very often affects apple trees, and wherever it is discovered should be cut out, or if very bad the entire tree should be destroyed.

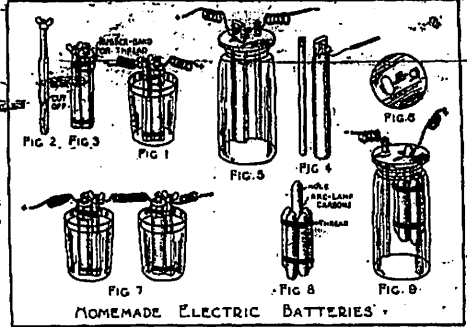

**Cultivation of Celery.**  
 Keep the soil very mellow around the celery plants. At each cutting draw a little dirt up toward the plant.

**Keep Milk Flow Steady.**  
 Darkened stalls and screens doors and windows in the dairy barn will help to keep the milk flow steady.

**Best Hog Feed.**  
 Cut green and feed to the hogs in enclosures alfalfa makes one of the best feeds in the world.

## New Ideas for Handy Boys

By A. NEELY HALL, Author of "Homemade Electric Batteries," "The Boy Outfitter," etc.

HOME-MADE ELECTRIC BATTERIES.

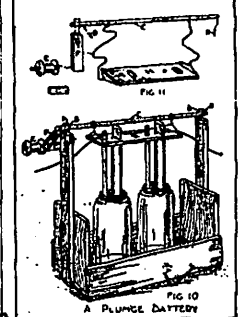

Every boy who experiments in electrical work should know how to make the common forms of battery cells. They are simple to make, and the materials are inexpensive and easily obtained. There are two general classes of batteries—those made for "open circuit" work, such as electric bell circuits and telegraph circuits, where the current is not drawn upon very long at a time, and those made for "closed circuit" work, such as for operating small motors, induction coils, etc., where there is more or less of a steady drain upon the current. The salt-ammoniac battery is the simplest of the open circuit type. A glass tumbler will do for a jar, an old battery zinc pencil with several inches of the eaten end cut off will do for the zinc element (Fig. 2), and the carbon from a worn out dry battery, cut to a corresponding length, will do for the carbon element. Fasten together the zinc and carbon with rubber bands, as shown in Fig. 3, after wrapping a piece of bicycle tape around the upper end of the carbon and inserting a small wad of it between the lower ends of the carbon and zinc, to keep them from touching each other. Make a solution of 3 ounces of sal-ammoniac to a quart of water, or 4 ounces to a pint. This battery will not be strong enough for more than simple experimental work. For a stronger battery, make two cells and connect the two in "series"; that is, connect the zinc pole of one cell with the carbon pole of the other, as shown in Fig. 4. A Mason fruit jar, or a large tubercin jar or wide necked pickle bottle, can be used for a larger battery cell. Use a full length zinc

element of this may be the same as those used for a sal-ammoniac cell, and a tumbler or Mason fruit jar may be used to hold the Saturated Zinc. The bi-chromate solution is made up of bi-chromate of potash, sulphuric acid and water in the following proportions:  
 Four ounces bi-chromate of potash  
 Four ounces sulphuric acid.  
 One quart of water.

In making up the solution, first add the acid to the water—not the water to the acid—and then when the solution has almost cooled add the bi-chromate of potash. Pour the acid slowly into the water, because the combination creates a great deal of heat, and if the heat forms too quickly your glass bottle is likely to split. Label the bottle in which you put this solution POISON.

The bi-chromate solution attacks the zinc element even when the current is not being drawn upon, so the zinc should be removed when the battery is not in use. To reduce the eating of the zinc to a minimum, it should be amalgamated by rubbing a thin coat of mercury over its surface. Dip the zinc into the solution first, then with a rag dipped in the solution rub the mercury onto it.

The plunger battery shown in Fig. 10 contains two bi-chromate cells, with the elements even when the current is not being drawn upon, so the zinc should be removed when the battery is not in use. To reduce the eating of the zinc to a minimum, it should be amalgamated by rubbing a thin coat of mercury over its surface. Dip the zinc into the solution first, then with a rag dipped in the solution rub the mercury onto it.

A PLUNGER BATTERY.

**Has Cow Working Overtime.**  
 A few weeks ago a dairy cow belonging to Blair Stanton, a Wyandott county farmer, produced eight quarts of milk a day, lost an eye in the hard brush.

The cow refused to associate with others of the herd, gloomed around and relapsed into a state of almost melancholy. From eight quarts of milk a day her output dropped to four. A veterinarian was called. He found no ailment except melancholy, and he solved the problem by providing her with a new day.

Next day the Jersey was found with the herd grazing in deep contentment. Best of all, she regained her milk and started off to make up for lost time. Now she is giving an average of milk a day and is happy.—Kansas City Star.

**Artesian Wells of Australia.**  
 The artesian well is one of the most important sources of water supply in Australia—a continent which by no means is lavishly supplied with the snow and glacier-fed rivers which are so abundant in this country. A government geologist states that in New South Wales there are 1,000 artesian wells, whose total capacity aggregated 324 million gallons. The deepest well is 3,000 feet deep, and one of them is bored to a depth of 5,000 feet. Two of these boreholes have given a surprising outflow of nearly 10,000,000 gallons daily.

## DR. A. D. MELVIN

Dr. Melvin, chief of the bureau of animal industry of the department of agriculture, has gone to the Argentine republic to investigate slaughterhouse conditions there because so much beef is now imported from that country. He will also visit Brazil, Uruguay and Paraguay.

## TRY TO TAKE ASQUITH'S HOME

MILITANTS FAIL IN THIRD ATTEMPT AT STORMING.

Leader Sylvia Pankhurst is Arrested in Fight—Police Use Clubs—Freely.

London, Aug. 12.—The third attempt of the suffragettes, under the command of Sylvia Pankhurst, to take Premier Asquith's house in Downing street, by storm, failed when the militant leader was captured; a cordon of police, thrown across Whitehall, after a stiff fight in which the officers used their clubs.  
 The trouble began after a mass meeting held under the auspices of the free speech defense committee, called to demand the unconditional release of George Asquith, former so-called member of the House of Commons, who was sentenced, July 30, to three months imprisonment for making inflammatory speeches, but was released Aug. 2 under the "cat and mouse act," while on a hunger strike. Miss Pankhurst had refused an invitation to address this meeting when informed that she would not be permitted to urge her hearers to march upon Downing street.

Free speech speakers advised the crowd not to attack the premier's residence, but at the close of their meeting Mrs. Pankhurst, true to her promise made last week, mounted the plinth of the Nelson column, and, in fiery words, ordered her sympathizers to follow her.  
 Hatless, her hair blown close to her head, the young militant leader started down Whitehall, surrounded by women carrying the Women's Social and Political Union flag surmounted by a red liberty cap, and preceded by a flying wedge of dock men and other husky East Enders. The police in Trafalgar square allowed the procession to leave the square and then fell in behind. The suffragette sympathizers saw the reason for this move when they encountered a battle line of policemen drawn across Whitehall at the Horse Guards.  
 When Sylvia Pankhurst and five other women and nine men were arrested the mob dispersed.

## CHINESE-REBELLION FAILURE

U. S. Admiral, Japanese Fleet is Far From Being Pacificed, However.

Washington, Aug. 15.—General improvement in conditions in the rebellious southern district of China was reported to the Navy department in a cablegram from Rear Admiral Nicholson, commanding the Pacific fleet at Hankow. The present uprising, reported Admiral Nicholson, "has met with failure at every point. The country, however, is far from pacified. There is now within the northern line of the rebellion a large number of troops who have renounced allegiance to the south, but disclaimers are threatened here owing to the presence of the rebel forces. With the southern forces, the American fleet was on the Pacific coast. The rebellion has been checked.

**Judson Jottings.**

William Schacht is getting his threshing rig in shape for threshing grain from the stock.

The estimated yield of wheat to the acre is from ten to fifteen bushels; oats and flax are placed at the same figure as last year.

Robert Iust is helping Charles Freize during harvest.

Carl Sherwood and Charles Lang are busy these days putting up a number of lightning rods.

Kunkel Brothers and William Schwinkendorf have formed a partnership and have purchased a new threshing rig for their own use.

The harvesting is nearly all done around here and grain stacks loom large in every direction.

William Wagoner of the Green Ridge country was a New Salem visitor this week.

Otto Schacht finished cutting for Wm. Paschke and Elias Kump last week.

William Starck farm is one of the best farms in this section and it is thoroughly equipped from one end to the other. He has a fine lot of fruit trees and shrubbery.

Wm. Schacht killed a coyote a few days ago, with his 32-20 Colt's revolver. Pretty good shooting at that distance with a revolver.

Misses Hattie and Agnes Albrecht were guests of Mrs. Otto Habener over Sunday.

**"It Beats the Dutch"**

Is an old saying but we BEAT all others when it come to low prices on Lumber.

See our Yardman Before Buying and get his figures. Prices and Estimates will be cheerfully given. See us and save money on your next bill of lumber. We can show you even if you are 'from Missouri'.

## 'I'll Carry My Own Insurance'

Has a very business like sound to you own ears when putting it up as an argument to get rid of the agent who has asked you to insure your buildings against fire and lightning. You did not believe yourself when

said. You knew the agent did not believe it and felt sorry you could imagine you could successfully carry your own insurance. "I'll carry my own insurance" has a much different sound when you stand at

the place where your house stood and look at the gray ashes and possibly a few pieces iron formerly a stove. All has been swept away in a breath by FIRE. The reward of year of toil and saving are gone. You must begin at the bottom once more. A

policy in the COMMERCIAL UNION OR HANOVER INSURANCE Companies would give you the money to build again. Ask about them at

EVENTS OF THE DAY HELD TO A FEW LINES

LATE EVENTS BOILED DOWN

Personal, Political, Foreign and Other Intelligence Interesting to the General Reader.

WASHINGTON.

Senator Lusk has introduced a currency bill that would revise the Ardric-Vreeland emergency currency act.

President Wilson has asked permission of congress to accept a status of William Pitt, sent to him by British admirals.

The president has submitted for confirmation several nominations, including Preston McGoogdin as minister to Venezuela.

The lobby investigating committee heard from James A. Emery National Association of Manufacturers' side of Mulhall lobby story.

Representative Britton has introduced a resolution for an emergency appropriation "large enough to begin construction of three additional battle ships."

A constitutional amendment prohibiting the sale of all alcoholic beverages was proposed in a resolution introduced by Representative Hobson of Alabama.

Senator Works and several other senators have planned a movement to reconsider Sherman Lewis' nomination of Thomas Fox as postmaster at Sacramento.

William J. Price of Danville, Ky., has been selected by President Wilson for minister to Panama. Mr. Price was introduced to the president by Senator James.

President Wilson has talked currency to a number of his callers and has made it plain that he intends to stick to his determination to have a bill passed at the extra session.

Senator Works and several other senators have planned a movement to reconsider Sherman Lewis' nomination of Thomas Fox as postmaster at Sacramento.

Reductions in express rates which will cost the company fully \$38,000,000 a year, approximately 14 per cent of their gross revenue, were ordered by the Interstate Commerce commission to become effective on or before October 15, 1913.

Charge O'Shaughnessy of Mexico City notified the state department that he had been invited by the Mexican foreign office of the release of Blesed, McDonald and Horrel, the Americans who had been held in Chihuahua prison since July 18.

President Wilson by proclamation has authorized the disposal under the registration plan of about one million acres of surplus land within the Fort Peck Indian reservation, northeastern Montana. All applications for registration must be sworn to and presented at Grassow, Great Falls, Havre or Miles City, Mont., between September 1 and 20.

Looking on the District of Columbia as an excellent ground for proselyting members of the National Council of Women Voters, which meets at Washington next week, announced that they would wage a vigorous street speaking campaign in the hope of making converts for the cause.

In order that the farmers of the United States may profit by the experience of farmers of Europe, Secretary Houston of the Department of Agriculture has decided to send abroad Dr. Thomas N. Carver, head of the rural organization service, and Bradford Knapp, who is in charge of the farmers' cooperative demonstration work in the south.

DOMESTIC.

Direct appeal for a senatorial investigation of the copper miners' strike has been made by the Western Federation of Miners.

George W. Hayes has taken the oath of office as governor of Arkansas, succeeding Senator J. M. Furell, who has been acting governor several months.

A position approximating half pay for every Episcopal clergyman more than 65 years old and financial aid for widows and orphaned children of clergymen are recommended in a preliminary report issued at New York by the commission on pensions of the Episcopal church.

In a circular letter sent out the currency committee of the American Bankers' association invited the presidents of several state bankers' associations and representatives of all clearing houses to meet with the commission in Chicago this month.

Mule prices are reported rising in Missouri. Chicago is to have a new detention hospital, to cost \$100,000. St. Louis is to have a new history hotel at Eleventh and Pine streets, to cost \$500,000.

New Orleans is to have one of the largest wireless telegraphy stations in the world, to cost \$100,000. The United States is a heavy coffee drinker, with 500,000,000 pounds last year, or 1.33 pounds per head.

Mayor Gaynor has vetoed a resolution recently adopted by the aldermen appropriating \$325,000 for the establishment of a municipal ice plant. Seven thousand women employed in New York knitting mills have struck, demanding shorter hours, higher pay and more sanitary working conditions.

Although Chicago housewives have been paying midwinter prices for butter and a further advance is expected, there are more than 65,000,000 pounds of the product in cold storage.

The Chicago Great Western railroad within ten days will put into effect the new Keokuk passenger rates as ordered by the United States supreme court in its recent decision in the Minnesota rate cases.

A bolt of lightning traveled through nearly a mile of tunnel in the Copper River at Globe Aris, jumped 100 feet down a wizza and nearly tore a leg off one miner and shocked more than a score of others.

At its annual convention the Michigan association of rural free delivery carriers intends to launch a movement to secure an increase in the salary of the rural carriers throughout the country. The association favors the raising of the pay from \$1,100 to \$1,300 a year and an additional \$200 for horse or motor car hire.

With the arrival in Lexington, Ky., of Sherman Lewis, United States marshal, news of the battle between revenue men and moonshiners become known. The fight took place in the mountains of Morgan County and Morgan Kidd was killed, while his brother John Kidd, was fatally injured. They were defending an illicit still.

Practically all the supreme officers of the Knights of Columbus were re-elected at this session of the annual convention at Boston. James A. Flaherty, Philadelphia, was elected supreme knight and John H. Reilly, Denver; Juigo Paul Leche, Donaldson, La.; N. A. Dussault, Quebec; William D. Dwyer, St. Paul, were elected national directors.

WAR ECHOES.

Government troops on August 4, captured the town of Tehan on Poying lake, the principal rebel base in the province of Kiang-Si.

A three days' armistice was agreed to between Rumania, Servia, Greece, Montenegro and Bulgaria. This action was taken to enable the plenipotentiaries to endeavor to reconcile the differences and claims of the various states.

The second Balkan peace conference having concluded peace on a basis of compromise which is unsatisfactory to all states concerned except Rumania, the question is being asked how soon a third Balkan war will break out.

Dr. Som Yet Sen, former provisional president of the republic, but now one of the leaders in the southern revolution has fled the country on board a Japanese steamer for Formosa, an island belonging to Japan in the China sea, off the province of Fuk-Kien.

An army of veterans and some thousands of recruits is being mobilized at the town of Maraca, fifty miles southwest of Caracas. These forces are expected to attack Coro, to the state of Falcon, and drive out Castro. They will proceed there in two divisions, by land and by sea.

Bulgaria has obtained under the agreement reached in Bucharest, a considerable portion of northern Macedonia, much more than the allies were at first inclined to give it, and also about sixty miles of the Aegean seaboard, which will enable it to build its projected railway from Philadelphia to the Aegean.

Dutts, American power plant engineer of the lumber mills of the Madera company at Pearson, Chihuahua, is a prisoner of Maximo Carrillo's gang of bandits, who are holding him for a ransom of \$200 in their mountain camp, two miles from that town, according to a report received at the local office of the Pearson syndicate.

FOREIGN.

A terrific hail storm seriously damaged crops near MacLeod, Alberta, according to reports. Crops in a strip of territory between seven miles wide and twenty miles long are reported to be a total loss.

The morning Post in an editorial in which it takes the ground that the government consideration involved is inactively and that the government to reconsider its decision not to participate in the Panama-Pacific exposition.

TENSION RELIEVED IN MEXICAN CRISIS

STATEMENT OF MINISTER RAMBOA OHERES U. S. ADMINISTRATION.

PLOT AGAIN BY PRESIDENT

Wilson Seeks Schemes to Involve This Country in Intervention—Naval Officer Reports That Americans Are Safe.

BULLETIN.

Tokio.—The Japanese government intimated today to the Mexican government that it would not receive General Felix Diaz as a special envoy to Japan to express the thanks of Mexico for Japanese participation in the Mexican campaign. It declared that it would receive General Diaz only as a private individual.

Washington, Aug. 13.—Distinct relief is apparent in official circles here over the course of events in Mexico. The statement of Frederico Gamboa, the new Mexican minister of foreign relations, that he had "great faith in the reasonableness of the judgment of the United States," holding the conviction that the "mischiefs between the two countries" soon would be adjusted, produced a very favorable impression in administration circles.

Officials Are Pleased. Secretary Bryan commented optimistically on it and White House officials also were pleased.

President Wilson pointed out during the day to callers what seemed to him conspicuous efforts on the part of some people unknown to him, through published misrepresentation, to involve the United States in intervention. He reiterated that the attitude of this government toward Mexico in the present situation was one of peace and friendliness solely.

The safe arrival in Mexico City of John Lind, personal representative and special envoy of the United States to the American embassy, ended some tense moments in the situation. Administration officials looked forward hopefully to suggest measures of peace in ending the struggle between the contending factions in Mexico.

See Triumph of Program. With the air cleared of rumors of hostility in the Mexican capital to Mr. Lind's presence there, officials were disposed to believe the program of the American government would be carried out quietly and in such a manner as seemed most expedient to Mr. Lind and the embassy at Mexico City.

Captain Capohart of the battleship Michigan, which proceeded last Thursday from Vera Cruz to Ciudad Del Carmen as the result of a complaint to the state department by Mrs. Phoebe Hearst that rebels were threatening American life and property near her ranch at that place, has reported that American subjects and foreign subjects have received proper protection from the Mexican authorities.

U. S. Note to Huerta Ready.

Mexico City.—The message of the state department at Washington which Special Envoy John Lind, who President Huerta is ready for presentation. The document has been translated into Spanish.

Nelson O'Shaughnessy, the American charge, took steps to ascertain whether the Mexican government would receive the communication. That it will do so there is little doubt.

Receipt of the message would not involve the reception of Mr. Lind or the withdrawal of the note, who also is in Mexico on behalf of the state department.

All persons concerned in the presentation of the statement of the attitude of the United States government toward Mexico are rather, but there is reason to believe that the full import of Washington's suggestions or demands will be left for a later stage.

Mexicans Uncommunicative. Mexican officials are uncommunicative regarding Mr. Lind, but unofficially their attitude of non-compliance with any plan of intervention on the part of the United States has not been altered.

Mr. Lind and Dr. Hale were in conference for several hours.

To Manage Husband's Estate. Atlanta, Ga., Aug. 13.—Trained by her husband while he lived, Mrs. J. G. Williams will take charge of the properties and conduct them in accordance with her husband's policy.

COL. EDUARDO HAY

Colonel Hay, chief of staff of the Mexican constitutionalists in the state of Sonora, appeared before the foreign relations committee of the United States senate and told it that if the embargo on arms were removed the Huerta regime would soon be ended.

CONDITIONS NEARLY NORMAL

DULUTH DOCK STRIKE REALLY ENDED, IT APPEARS.

Boats Being Loaded Rapidly—Supporter Men Refuse to Return to Work.

Duluth, Aug. 13.—Conditions are nearly normal in the Duluth harbor. Boats loaded all day at the Misabe, the Hoo and in Superior at the Alouez.

From the records of departure at the tug office the swing of lake traffic is nearly normal. There practically is no wild ore tonnage in sight at the present time and with no further trouble on the docks it is not expected that the slight delay in the loading at the Duluth harbor will change in the least the freight situation on the Great Lakes.

At the Alouez ore docks, Superior, 324 men were at work, which is 44 more than the full crew at the time of the strike. One hundred and seventy-five were at work Monday night.

The strikers in Superior still are solid and the work is being done by outside men. The strikers declare they will stay out until their demands are granted.

SOUTH GETS FIRST DEPOSIT

Half of Amount to Move Crops to be Placed in Cotton States.

Washington, Aug. 13.—Definite announcement regarding the character and amount of commercial paper that will be accepted by the treasury department as security for the additional \$50,000,000 of government deposits, will not be made until after the last conference with the bankers from the far western states on Thursday.

It was indicated at the department, however, that the proportion of commercial paper accepted will be larger than was at first planned.

The apportionment of the funds will not be begun until after the last conference, although tentative arrangements for distributions have been made. The department expects to place at least half of the \$50,000,000 in the cotton states and the deposits are to be made in that section first, because of the earlier movement of the cotton crop.

Delay Peaches' Demands.

Washington, Aug. 13.—Dispersible lenders by the senate are considerably perturbed over the failure to make progress in the tariff bill and for several days informal conferences have been held with Progressive Republicans and other Republican leaders in the hope that some means to hasten consideration of the measure might be found. It is stated, however, that nothing definite has been accomplished.

Several drafts of the revised schedule were discussed yesterday.

President with Wine Point. Shipwrecked, Aug. 13.—The ad ministrators of the wine industry are early in the proceedings of the Inter national wine congress at San Francisco, called to order here for a time how to handle the wine from the state of California.

From the president and the other members of the committee on the wine industry, the right to name the committee or appoint was lost by a vote of 170 to 72.

SULZER ISSUES A COMPLETE DENIAL

NEW YORK GOVERNOR SAYS CAMPAIGN MONEY NOT USED TO SPECULATE.

NO ILLEGAL USE OF FUNDS

Declares He Never Heard of Firms Mentioned in Testimony—Probers Report to Legislature.

Albany, N. Y., Aug. 13.—After a long conference with some of his close political advisors, Governor Sulzer has issued a statement denying that he ever used campaign funds for speculative purposes.

He says he never heard of the stock brokerage firms of Fuller and Gray and Boyer and Griswold, alleged transactions with which figure largely in the testimony before the Frawley legislative committee, until those names were brought out before the committee.

Governor Sulzer's Statement.

The statement follows: "In view of the fact that the Frawley committee is about to make its report of the investigation I have been making, I am advised that it would be unwise for me at this time to make any detailed statement. But having promised the press a statement I make the following brief reply to the matters that I am informed have been brought before such committee:

"I deny I used any campaign contributions for personal use.

"I deny that I speculated in Wall Street, or used any money contributed for campaign purposes to buy stocks either in my own name or otherwise.

"I never had an account with Fuller and Gray or Boyer and Griswold. I do not know the members; and know nothing about the transactions with these firms testified to before the Frawley committee until the alleged transactions were brought to my attention by the committee.

Loan Made Upon Stock.

"The stock matter with Harris and Fuller was not speculative in character, but a loan made upon stock as collateral which stocks had been acquired and paid for years before my nomination for the office of governor, and from other sources than Harris and Fuller.

"Certain checks given to me for campaign purposes, were deposited in my personal account and thereafter I paid the amount of said checks to my campaign committee.

"Report Will Be Short.

"In filing my statement of receipts and disbursements with the secretary of state, I relied upon information furnished me by the persons in immediate charge of my campaign and in whom I had and have the most implicit confidence, and I believe the statement furnished by them to me is accurate and true."

Senator Robert F. Wagner, president pro tempore of the senate, and Speaker A. E. Smith, of the assembly, are at Saratoga Springs, and will be in Albany for the Frawley committee, spent the day there also preparing a draft of the report.

Mr. Richards said that the report would be short and would deal principally with the testimony concerning Governor Sulzer's campaign contributions and stock transactions.

In view of the vital importance of the 17 Republican senators, in case the assembly determines to institute impeachment proceedings, it is recalled that early in the regular session that Senator Baton R. Brown, the Republican leader, intimated broadly that if it could be proved that Mr. Sulzer, during his campaign, had given a full railroad crew bill in return for support from the labor organizations, that fact would constitute grounds for impeachment.

The general impression is that the majority of the assembly, more than two thirds in the assembly, there will be enough Democratic votes in that body to initiate the impeachment proceedings without the aid of the Republican and Progressive Seventy-six of the 102 Democratic assemblymen would be sufficient to accomplish that end.

PUEBLO, CO., IS ENDANGERED

Cloudbursts Cause Rivers to Rise and Warnings of Floods to Follow.

Pueblo, Col., Aug. 12.—The springing of Pueblo and Colorado rivers by cloudbursts and heavy rain during the night of the 10th and 11th inst. has resulted in the Pueblo river rising to a high stage, and threatening the city of Pueblo, Colo., with a serious flood.

The Pueblo river has risen to a high stage, and threatening the city of Pueblo, Colo., with a serious flood. The Pueblo river has risen to a high stage, and threatening the city of Pueblo, Colo., with a serious flood.

WOMAN TOOK FRIEND'S ADVICE And Found Health in Lydia E. Pinkham's Vegetable Compound.

Windsor, Kansas. "I had a displacement which caused bladder trouble and I was so miserable I didn't know what to do. I suffered from bearing down pains, my eyes hurt me, I was nervous, dizzy and irregular and had female weakness. I spent money on doctors but got worse all the time."

...I tried and told me about the Pinkham remedies and I took Lydia E. Pinkham's Vegetable Compound and was cured. I cannot praise your remedies enough for I know I never would have been well if I had not taken it."

Consider Well This Advice. No woman suffering from any form of female troubles should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for nearly forty years proved to be a most valuable tonic and invigorator of the female organism.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, returned by mail, by a woman and held in strict confidence.

Briggs.—So Judge is getting better. Briggs.—Yes, he will soon be all right now. But, talking about sales, you know we had nearly \$100 raised to put up a nice monument for him.

Fighting Recognition. In view of the fact that the mining industry has contributed more than \$40,000,000 to the wealth of the United States during the last quarter of a century, it is not surprising that it is planned to make an impressive display of this industry at the Panama-Pacific International exposition, to be held at San Francisco in 1915.

His Vision. Wife—There is fish in that architect's work on our new home. Husband—Sure there is, but it's my fish.

The Difference. "The mobile face is a constantly changing one." "And the automobile face is a fixed star."

Important to Mothers. Examine carefully every bottle of GASTRO-GA and cure remedy for infants and children, and see that it bears the signature of Dr. J. C. Williams in Use For Over 25 Years. Children Cry for Fletcher's Ointment.

Protecting Himself. "The doctor says you have an hour to live." "Give me pen and paper," said the dying man.

"To make your will!" "No, I am going to give the doctor a note for 25 cents. He will have to keep the alive that long, at least, so as to be collected."

Fish Not Wanted. "I hear you're going to marry Archie Blueblood, Diana. Is it true?" asked one young society woman of another.

"I hear you're going to marry Archie Blueblood, Diana. Is it true?" asked one young society woman of another.

Right and Left. Pat, who was left-handed, was being sworn in as a witness in the West side court of Denver, Colo.

Pat, who was left-handed, was being sworn in as a witness in the West side court of Denver, Colo.

Hold up your right hand. "Hold up your right hand," commanded the judge, sternly.

"Hold up your right hand," commanded the judge, sternly.

**A Growing Industry.**  
(Continued from page 1.)  
While there the writer went into the refrigerator during the time of refrigerating machine was not in action, and found the thermometer was close to the zero mark. When the machine, which is a new type installed by the Creamery Package Co., Chicago, is running only an hour or two a day is necessary to keep the temperature near the zero mark.  
A few remarks about the proprietor, Mr. William N. Hess and the employees who are making Glen Ullin known as the "Elgin of the northwest," are in order at this time:  
Mr. Hess owner of the plant has had many years experience as a buttermaker and creameryman. In his work when he started many years ago with one cow and a hand churn, he kept in his mind this one word "Quality," and as time passed he found his quality butter was a means of bringing about the realization of his boy- and manhood's most worthy ambition, the fine plant and equipment located on a slight eminence in the south part of the progressive city of Glen Ullin, North Dakota.  
The buttermaker, Mr. Henry C. Schulte, a thoro, clean, aggressive business man, is a graduate of the School of Agriculture of the University of Minnesota. He has entire charge of the work in the production department, and has by his attention to detail earned an enviable reputation among the creamerymen of the northwest. One instance, happening while on his vacation which he spent in the west, will suffice. While calling on a dealer who takes a carload of Fernwood brand butter every ten days, and who deals with seventeen creameries, the statement was made that "Butter from the Hess Creamery Co. was the best". An examination of June butter was made in December, showed it to be as sweet and fresh as when it was shipped, and the western buyers importuned Mr. Schulte for more butter than the factory turns out.

The engineer and mechanical expert, Mr. S. C. Anderson, is also one of the important cogs in this modern industrial institution, for a great deal depends upon the condition of the machinery in turning out a perfect product.  
The office is well equipped to expeditiously take care of the large amount of clerical work required to audit the daily reports of a number of cream buying stations throughout the western part of the state.  
And when the fact becomes generally known that the Hess Creamery Co. daily pays Morton county farmers over \$500, the people of Glen Ullin—yes, of Morton county should be proud that such a large and successful institution exists within its borders.
