

# THE WEEKLY ARENA

Volume 4, Number 4.

ALMONT, MORTON COUNTY, NORTH DAKOTA, JANUARY 17, 1914.

Price, Per Year \$1.25

## Notice of Citation, Hearing of Final Account and Distribution of Estate.

State of North Dakota, County of Morton.  
In County Court, before Hon. J. C. Johnson, Judge.  
In the Matter of the Estate of Ferdinand Krauth, Deceased.  
Estate of Ferdinand Krauth.

Notice is hereby given that Ferdinand Krauth, Jr. and Paula Krauth and all other persons unknown having any interest in said estate.

The State of North Dakota to the Above Named Respondents:

You, the said Henry Krauth, Jr., Paula Krauth and all other persons unknown having any interest in said estate are hereby notified that the final account of the administrator of the estate of Ferdinand Krauth late of the County of Morton in the State of North Dakota has been presented to this Court, the return of which the estate of said deceased is ready for final settlement and distribution, and that if you do not appear at the hearing of said estate as directed by this Court, the same will be distributed to the persons thereto entitled, and you will be held to have waived your right to be heard.

And you, the above named respondents, and each of you, are hereby cited and required that you do so appear before this Court and show cause, if any you have, why said account should not be allowed, the residue of said estate distributed, the administration of said estate closed and the said Ferdinand Krauth, administrator thereof, be discharged.

Dated the 15th day of December, A. D. 1913.

J. C. Johnson  
Judge of the County Court.

Let the foregoing citation be served by publication in the Almont Arena.

J. C. Johnson

## ECONOMISTS ON CO-OPERATION.

That interest in co-operation is growing is shown by the fact that the Minnesota Academy of Social Sciences devoted its annual meeting, held in Minneapolis on December 4th and 5th, to this subject. Papers were read by Professor C. W. Thompson on Essentials of Co-operation, Judge Wilson of Stillwater on Legal Aspects of Co-operation, Professor L. D. H. Weld on Co-operation in Minnesota, Mr. H. A. Webb on Co-operation A. Broad, and by "Jim" Caldwell of Lakefield, the Minnesota member of the American Commission on Community Co-operation. The principal features of the meeting, however, were papers read by George Woodruff of Joliet, Illinois, on Land Credit, George Simon, Western Agent of the Jewish Agricultural Aid Society, on Personal Credit, and George Keen, Secretary of the Co-operative Union of Canada, on The Co-operative Movement. Mr. Woodruff explained the principle of amortization of long-time mortgage loans whereby the farmer borrows money for periods of twenty or thirty years or longer, and pays a comparatively low rate of interest, part of which is applied to wiping out of the loan itself. Mr. Woodruff's bank in Joliet, Illinois, has begun to do privately what farmers may do co-operatively, and what they have done so successfully in foreign countries.

Mr. Simon explained what has been accomplished in the way of co-operative credit among the Jewish farmers of the United States. Small loan credit has been had in the United States for some time. It is a good move to secure a few of the earnings from the surplus of the land above described, before G. H. Anderson, U. S. Commissioner, at Almont, North Dakota, on January 22, 1914.

## "No Enemies."

You have no enemies, you say; your friend, your host is poor. He who has mingled in the fray of duty that the brave endure must needs make foes. If you've made none shall be the work that you have done.

You've put no greater down and out, Or put no treacherous wretch to rout. You've never turned wrong into right— You've been a coward in a fight.

C. A. and A. Knutson, C. E. Kelsen, H. M. Silvernail, John Uhlir, the scribe went to Glen Ullis, the first of the week to attend a meeting of the Commercial Club of that city. The chief address of the evening was by Mr. Nagel, state organizer of the N. D. Retail Merchants' Association. That address was loaded to the brim and running over with good, everyday, commonsense which, if known, could be put into daily use by every business man whether on the farm or in the bank or in store.

Everyone was well pleased with the address and every effort was made by the business men of Glen Ullis, to entertain the Hebron and Almont delegations. Some of the Almont visitors were taken in tow by Messrs. Hess and Schulte and shown the fine plant of the Hess Creamery Co., where the national "water 13" made, the butter that was awarded the silver medal at the national meet in Chicago. A short tour of inspection of the factory was made and a brief outline of process of manufacture was given.

Those who went from this place state they were highly pleased with the evening's entertainment, and hope to have an opportunity to hear Mr. Nagel speak again. Mr. and Mrs. August Timmerman returned to Almont, Friday, from the twin cities, where they had been to consult a specialist in regard to Mrs. Timmerman's eyes. The social gathering Saturday evening, by the Kensingtons, was a social and financial success. A goodly addition was made to the treasury of the club.

Mr. Nagel organizer of the Retail Merchants Association, spent a few hours in this place to-day. He expects to hold a meeting here in a few weeks. This fine brand of weather with which this community has been favored, has compelled the "weather" reporters of yore old school "to sit back and listen to the praises of this winter, and not be able to say "Tis 'minds me o' th' winter o' dumpy-even".

W. F. Portland left Monday, on No. 6 for Minneapolis, to look after some important business matter. The Kensington Club were entertained by Mrs. O. C. Ellingsgaard, Wednesday afternoon. W. B. Evans of Bismarck, who organized the Almont local of the Farmers' Union, transacted business in this section this week. Mrs. Clara Palmquist who was born two weeks ago, is improving quite rapidly. From latest reports she will soon be able to get about again.

J. B. Boylup will have a public sale at his farm, Monday, January 28. Mr. Boylup expects to leave shortly for Princeton, Minnesota where he has purchased a farm.

Good Bowels Are An Aid to Growth

Growing Children Need a Mild Laxative to Foster Regular Bowel Movements.

As a child grows older it requires more and more personal attention from the mother, and as the utmost importance to health, great attention should be paid to them.

A very valuable medicine for children is Cascarets. It is a laxative and tonic combined, so mild that it is given to little babies, and yet equally effective in the most robust constitution.

"The Devil to Pay." The expression, "The devil to pay and no pitch to burn," had its origin in the shipyard.

"CASCARETS" FOR A BILIOUS LIVER

For sick headache, bad breath, Sour Stomach and constipation.

Get a 10-cent box now. No odds how bad your liver, stomach or bowels; how miserable and uncomfortable you are from constipation, indigestion, biliousness and sluggish bowels.

Don't let your stomach, liver and bowels make you miserable. Get Cascarets to-night; put an end to the headache, biliousness, dizziness, nervousness, sick, sour, gassy stomach, backache and all other distressing ailments.

# METROPOLITAN MUSEUM OF ART

MAIN ENTRANCE

THE Metropolitan Museum of Art is the greatest aggregate in the western world. If it were not such an orderly establishment it might be compared to an Aladdin's cave, manifesting a thousand times as far as its walls, its cabinets and its treasure, but its displayed objects are not objects worth \$100,000,000, exclusive of the financial resources of upward of \$10,000,000. It holds individual works of art that are the finest things of their kind in the world. It has collections that have been seen in the great galleries of Europe. It is only 12 years since it was organized, and yet that half the span of the human race's life it has grown from articles to the present marked in the history of art museums in the world. And it never has been able to exhibit anything like all the art objects in its possession.

**Long Called an Art Pirate.**

It is only for the reason that it is such a public institution that one refrains from calling the museum a kind of gorgeous pirate's lair, filled with precious treasures, manacled a thousandfold, as the kids and Morgan of the Spanish Main were wont to gather in as loot from the galleons and cities they raided.

Indeed, ever since the Metropolitan museum trustees made their purchase of a collection as a whole in 1872, when they took the Cesnola antiquaries away from the British museum, no greatest art institution has been looked upon in Europe as an art pirate ranging the seas of that particular world and preying on every available treasure that showed its head above the horizon. What Desart could not induce the British nation to do to keep the Cesnola collection through its purchase, J. Pierpont Morgan was able to accomplish and bring it to New York. The museum, however, is the most honest pirate's lair that ever was.

When the museum was first organized, in 1872, the officers and trustees started out to raise \$250,000, and the first collection they brought was one of 125 paintings of European schools, for which they paid \$128,182.75. At the present time there are two single objects in the museum that cost \$500,000 each, and the institution has only recently been presented with the Benjamin Altman collection of 25 paintings that are valued at \$1,000,000.

That comparison serves to indicate the spirit in which the museum is regarded nowadays as compared with the era of its beginning, when its most important acquisition, the Cesnola collection of Cypriot antiquities, one of the most sensational art transactions that the country ever has known, and when the museum seemed to have no more to have nothing but money would liberally surpasses that of any of the great judgments of history or fiction.

Some of the friends of the museum, the late J. Pierpont Morgan, the late John G. Morgan, and others who have since died, or who are now old and infirm, were the ones who made the Cesnola collection one of the most sensational art transactions that the country ever has known, and when the museum seemed to have no more to have nothing but money would liberally surpasses that of any of the great judgments of history or fiction.

Some of the friends of the museum, the late J. Pierpont Morgan, the late John G. ## PRETTY RIBBON CASE

DAINTY AND MOST USEFUL ACCESSORY FOR BOUNDING

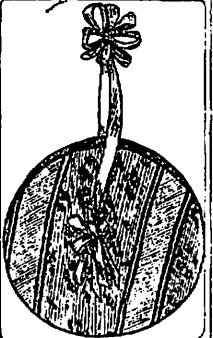

Work of Putting It Together Will Prove an Amusement for the Spare Hours—Only Cardboard, Ribbon and Thread Required

Every one who keeps a special roll of ribbon for any purpose will like the little case illustrated.

Ribbon, especially disappears just when it is wanted, but if hung on the dressing table the owner will find that much time will be saved which might otherwise be spent in a fruitless search.

The case was made from two pieces of white cardboard. Each piece was cut three inches in diameter; one inch larger than the roll of ribbon which was to be inserted.

The cardboard was covered with a pretty damasked ribbon, which was se-

Complete Case

parately suitable, as it had remained through it a solid diamerical thread.

Two circular pieces of ribbon were cut out to cover each piece of cardboard, and joined together by over sewing all round the edges.

"The roll of non-elastic ribbon was then inserted between the covers, and a hole pierced through the middle of the top letter and the roll of ribbon. A piece of ribbon was threaded through the holes and sewn securely in each cover. It was then joined at the top into a pocket.

In the center of each cover a small orifice with a hole was made to give a finishing touch.

Should the owner wish to purchase a set of three for a present the color scheme of the owner's room should be taken into consideration.

The case would look delightful covered with white linen, lined with blue or pink ribbon. The monogram of the owner should be worked in the same color.

In order that the covers could be removed easily when soiled, but without injury to the ribbon, the inner covering should be worked at short distances apart around the edges. A strip of ribbon should then be run through these and tied in a bow.

Another holder which is very easy to make is constructed from half a yard of ribbon.

The worker should choose a wide web of silk ribbon covered with a pretty floral design. To make the case, the ribbon should be turned up about one-third of the width, and caught at intervals of three or four inches with a neat folding stitch to form pockets.

The holes on either side should be finished in the same way.

The worker should best take some

with white cardboard, and cut into four pieces of the shape of the pocket slightly made. These pieces of cardboard should be slightly smaller than the pocket, otherwise they will not fit in easily when wound with ribbon.

Some pretty designs for ribbons should next be chosen, and a different color would round each cardboard and arranged in the various pockets.

To complete the case the worker should add a tiny pair of scissors to hang on to the case. These should be attached by means of a narrow piece of ribbon to the center of a pocket should be fastened in the same manner, and slipped into a narrow pocket, which should be allowed for when making the ribbon pockets.

A piece of ribbon should be sewn on the back, so as to tie the case together when folded.

The case of the description would take up very little room in a drawer or box, for it has the appearance of a cardcase when folded.

## DESIGNS FOR SACHET CAPS

Selection of Material an Important Thing for This Latest Very Popular Fancy

Should be of handkerchief linen or muslin, the heavier the better, for the effect of the sachet cap is entirely confined within the cap's delicate limits; it would escape through a thin material. Cut from the goods a round about 10 inches across and mark out the edges with a double or single line for scallops. Buttonhole the scallops and edge with a narrow Valenciennes lace to relieve the somewhat severe appearance of a cap. Run a narrow casing about an inch and a quarter above the scallops for the elastic in the center work a solid strand in white muslin, for elastic would permit the color of the sachet to escape. Make a flat, three-fold square sack bag of the material and line it with heavy or handkerchief linen will be heavy enough, a thin layer of cotton and plenty of sachet, and binds it to the center of the cap slightly above the center design. Use a basting stitch, with very tiny stitches on the outside and large ones inside, so that the basting could be removed when necessary on the outside. Place a twisted ribbon about the cap over the elastic casing and a small ribbon bow in the center of the cap, just above the elastic.

There was considerable concern about these Indians, and only in the country where they were, but at Washington "The Navajos are good fighters. These men were well armed and their tactics were better because somebody had tried to break up their polygamous habits.

They had said they were ready to fight until they were dead, and that at this time troops from the southern side of the United States are more interested in other things than making good Indians out of bad Indians.

Major Tappan, who led this camp alone, as has been said, and the others called for a sword. Hours later he rode out of camp, this time with the chief of old men. That night the Navajos began to straggle back to the agency to surrender, satisfied with what their leader had told them and relying upon his word.

Major Tappan is the Indian name for Brigadier General Hugh L. Root, commanding the Second Brigade of cavalry of the southern department.

General Root is a Kentuckian and was graduated from West Point in 1876.

## WHO WHO

### SAYS TEUTONS FRIENDS OF UNCLE SAM

Prince von Buelow's references to the relations of the United States and Germany in one of the chapters of his book on "Germany Under the Rule of William II.," in which he deals with German policy, show how much the former imperial chancellor valued the friendship of the American government and people. He says, in part: "During the Spanish-American war a portion of German public opinion displayed strong sympathy for Spain, and this was not agreeable to the United States. The manner in which incidents that occurred between the German and American fleets at Manila were made the most of in a portion of the English and American press also cast a cloud over the relations of Germany and the United States.

"From the point of view of sensible policy there is no reason why Germany and the United States should not be on the best of terms. I do not see any point where German and American interests should clash, and our development should occur each other in an inimical way.

"In the United States live about 10,000,000 Germans. Among them is a growing effort since the foundation of the German-American National Union in 1901, while remaining loyal to their own Fatherland, to keep up their relations with their old home and to strengthen them. So long as justice here and in the United States are in fair hands, and ever so widespread of friendship as well as nervous feelings in connection with occasional frictions are avoided—and thus things happen now and then in reconstructed relations—we need not have any fears as to our relations with the United States."

There was considerable concern about these Indians, and only in the country where they were, but at Washington "The Navajos are good fighters. These men were well armed and their tactics were better because somebody had tried to break up their polygamous habits.

They had said they were ready to fight until they were dead, and that at this time troops from the southern side of the United States are more interested in other things than making good Indians out of bad Indians.

Major Tappan, who led this camp alone, as has been said, and the others called for a sword. Hours later he rode out of camp, this time with the chief of old men. That night the Navajos began to straggle back to the agency to surrender, satisfied with what their leader had told them and relying upon his word.

Major Tappan is the Indian name for Brigadier General Hugh L. Root, commanding the Second Brigade of cavalry of the southern department.

General Root is a Kentuckian and was graduated from West Point in 1876.

## PACIFIER OF THE NAVAJOES

Here are some interesting facts regarding Hugh L. Root, who persuaded the Navajos not to go on the war-path recently.

Major Tappan, the man who talks with his hands, rode into the armed encampment of the warlike Navajos on a beautiful morning, Colorado. The rode alone except for one old Navajo soldier who had gone out to meet him 40 miles away from "United States soldiers who had been sent out after the two-day men had jammed the Shiprock agency, two weeks before.

There was considerable concern about these Indians, and only in the country where they were, but at Washington "The Navajos are good fighters. These men were well armed and their tactics were better because somebody had tried to break up their polygamous habits.

They had said they were ready to fight until they were dead, and that at this time troops from the southern side of the United States are more interested in other things than making good Indians out of bad Indians.

Major Tappan is the Indian name for Brigadier General Hugh L. Root, commanding the Second Brigade of cavalry of the southern department.

General Root is a Kentuckian and was graduated from West Point in 1876.

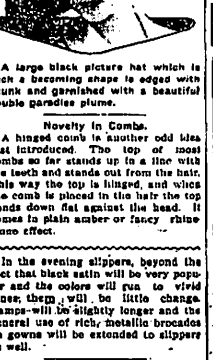

## LOVELY PICTURE HAT

A large black picture hat which is such a becoming shade is edged with silk and finished with a beautiful double garland plume.

Novelty in Combs.

A hinged comb in another odd idea just introduced. The top of most combs so far stands up in a line with the teeth and stands out from the hair. This was the top is hinged, and when the comb is placed in the hair the top hands down flat against the head. It comes in plain amber or face, white stone effect.

The Knitted Hat.

Right in line with the soft crowns of the military hat, knitted hats of the cutoff and frames the face instead of just sitting on the head as was at one time the mode, we now have knitted hats that are designed to fit the best of a Tam-o-Shanter, whether it is becoming or not, the sporting hat of this season will be made to stimulate all the fashionable military in the tailored styles. They are so comfortable and chic in appearance that they are bound to become a popular knockabout wear. Many girls' caps, are displayed with the military and children's school military. The military or young woman may have a rich hat as she desires. They are made in silks and chenilles, beaded, velveteen, wool and cotton, all suitable of a touch of stylish trimming.

Girls' Tunic.

A clever way to bring into style last year's dress is to add the touch of these girls' tunics. They are made of velvet, or plush and are worn over the dress, over and under the back with a full and graceful plaited tunic at the top. The tunic is made of silk or cotton, and is worn over the dress in a full and graceful plaited tunic at the top. The tunic is made of silk or cotton, and is worn over the dress in a full and graceful plaited tunic at the top. The tunic is made of silk or cotton, and is worn over the dress in a full and graceful plaited tunic at the top. The tunic is made of silk or cotton, and is worn over the dress in a full and graceful plaited tunic at the top.

## SPRING SHOE STYLES READY

Duties and a Tendency to Low Heels Promise to Be the Features of Coming Season.

Long before a woman buys her fall shoes the makers have planned the styles for the following spring—so far in advance of fashion is the wholesale trade.

And, as that nothing but button shoes will be worn next spring, the patent and low leather will be used mostly and that there has a tendency to be very low.

This does not mean that there will be a craze for the almost featureless shoe of the summer just gone—far from it. The latest hat will be the fashionable hat of the Cuban we have known. For girls the little heel will be good always, and for coming year, the beeline, rubber-soled shoe will be as popular next summer as it has been.

Turned-toe shoes will be used extensively and such as a low back will be to dark shades—light has only in outing styles.

Moreover, for dress wear, makers predict a vogue of fancy shoes; that is blacker dark tan ramp, with colored soles, these to match the gown or dress.

Speaking of rubber-soled shoes, there were a born in that they were soft and comfortable, they were found in the foot, and were very low-heeled.

There is to be an increase in the number of low-heeled shoes, and in the number of stores, a few will be, named by a "pactal rubber" that makes it as flexible as rubber, yet light for women with sensitive feet this low-heeled shoes.

## CLARK REELS OFF A YARN

In the house cloakroom at Washington the other day some one heard Speaker Clark telling a good story about two members. It seems that they flourished here in town a few years ago a literary bureau which furnished speakers with facts or even whole sermons and speeches. The line of "dope" was guaranteed to fit anything from a Chinese wedding to a Masonic funeral.

Some of the congressmen availed themselves of this chance to drink of the waters of learning without the trouble of even getting a dinner, and the bureau flourished, turning out productions of all kinds and sorts at will.

The same bureau employs would write a violent attack on the tariff bill, and then, in a few hours, he would train his guns on his late friends. Like the Nikes, the wheat worked for pay no story.

But one day he met his Waterloo. It seemed that two members of congress had ordered speeches on exactly the same subject, members, of course, to each other. These speeches were not delivered in the house, but were given in full in the Congressional Record under the privilege of leave to print. Each was a fine, convincing array of facts.

"But," added Speaker Clark, "the only trouble was that the bureau had sent the same speech to both men."

## HOBSON'S BRIDEGROOM STORY

Representative Richmond P. Hobson, claimed, in an interview, that the words "pitter attack" which were used during the recent debate in the house, were an exaggeration.

"I'll admit," he said, "that this description was rather heated, and I'll admit that neither my opponent nor myself paid each other many compliments. But political controversies seldom yield compliments.

The hero of the heroine smiled.

"It is in situations like the yours and mine," he said, "that we must look for the perfect compliment and here it is."

A young Alabamian who had just been elected to the house, was asked what he thought of the "pitter attack" which he had just made on his opponent.

"I'll admit," he said, "that this description was rather heated, and I'll admit that neither my opponent nor myself paid each other many compliments. But political controversies seldom yield compliments.

The hero of the heroine smiled.

"It is in situations like the yours and mine," he said, "that we must look for the perfect compliment and here it is."

# For the LITTLE ONES

## INSTRUCTIVE FOR THE BOYS

Many Pretty Things May Be Constructed by Skillful Use of Toy Steel, Just Put on Market.

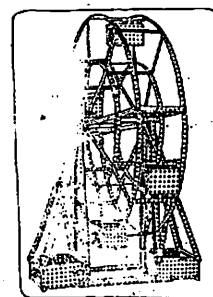

Toy structural steel, from which an ingenious boy may build anything that a real engineer would make out of real steel members, is now being widely advertised and is a feature of the holiday exhibits. Some of the things that may be constructed in this way are: bridges, derricks, cranes, sailing yachts, in fact, from a toy wagon to a miniature printing press. A writer in the American Engineer (New York) comments thus as a realization of the young mechanic's idea to "build something himself." "The boy with a mechanical mind, he says, is always satisfied with shop toys. He would

A Derrick Built of Toy Structural Steel.

A hundred times rather take a hammer and nails, and with what odds and ends he can find work and some idea of his own than to possess of whole houses of ready-made toys and dummies, which, to the critical eye, lack many important details. The writer goes on:

These dummies consist of strips of varying lengths and having holes punched at distances from end to end. Included in these sets are also gears, pulleys, pulleys, flanged wheels, axles, levers, etc., which give the boy all the necessary materials to build up almost any kind of a miniature machine. The strips are held together by means of small screws and nuts, and the structures that can be built in this way is a remarkably short spare of time by any boy or adult declared to be surprisingly real in appearance. The various metal strips are formed in imitation of structural steel beams, and the young engineer in this way acquires a knowledge of the strength of materials and elementary engineering practice which many weeks of study from books would probably fail to impress upon his mind. He also becomes familiar with the forms of many of the well-known works of engineering and acquires a knowledge of the subject which cannot fail to be of great value to him in later years, even though he may not follow the engineering profession.

Ferris Wheel Made From Toy Steel Parts.

It is of good solid stuff, but the fact that it is always obtainable in the form of a complete manual of instructions, which is furnished with each set, is one of the chief features of this new toy. It is well known that the young mechanic who is equipped with the necessary tools and materials, and who is able to construct his own power plant, is the boy who is most likely to become an inventor.

# LITTLE JIM WAS INTERESTED

Not in Wonderful Deeds of Hero in Story "Tommy" Was Read, But in How Cracked Teeth.

You could have heard a pin drop in the kindergarten as Miss Mary told the story of "Tommy." It was a story of a boy who had cracked teeth. In the afternoon of the story, the children were all breathless over the wonderful feat of the little girl who had cracked her teeth.

Archie's performance, such as using only one leg of a chair, phoning his neighbor, or trying the feat of the little girl who had cracked her teeth, were all more desirable forms of entertainment, according to Jimmie's idea. In the afternoon of the story, the children were all breathless over the wonderful feat of the little girl who had cracked her teeth.

She had become so tense herself in her interest that there was an audible sound all around the circle as she said the last word. Then, she said, "What would it be? Perhaps a resolution to be like this boy, perhaps—but this is what he really said."

# BUILDING BLOCKS OF SNOW

German Novelty Placed on Market for Amusement of Children in Construction of Forts.

An ingenious novelty on the German market is an adjustable wooden form of the kind used in concrete building. By means of which children can construct blocks of snow for various kinds of snow structures, such as cabins, igloos, castles, forts, etc. The manner of using the form is simply to fill them with snow and tamp it down.

Building Wall of Snow Blocks.

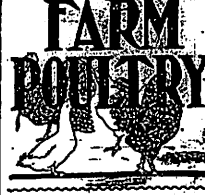

# ENGLISH AND AMERICAN BOYS

New Haven Educator's Surprising Statement to London Times—Opinion Entitled to Weight.

George I. Fox of New Haven, who has been an educator in that city for a long time, and is a student of school conditions in the English public schools for the last 10 years, has made the comparison between the English schoolboy at the age of eleven years to two years farther advanced in his studies than the average American schoolboy at the same age (thirteen years).

# FACT AND FANCY

When you choose either a fact or a fancy, you are making a choice. A fact is something that is true, and a fancy is something that is not true. It is important to know the difference between the two.

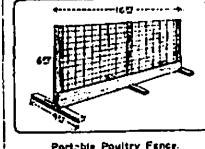

# FARM

## POULTRY FENCE IS PORTABLE

Problem of Keeping Fowls on Same Soil for Years and Maintaining Sweetness is Solved.

I built a fence last summer that has proved very successful. It has long been a problem how to keep your fowls on the same soil and yet have it fresh and sweet. We planted different crops in our yards after we were through with the breeding season. We found very beneficial, but as the yards had to be dug up by hand it required much labor. I there made up my mind to try the solution by using portable fence.

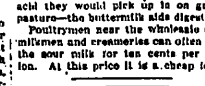

Portable Poultry Fence.

Stand up three of the T's eight feet apart and place the bar board on them. Then, on the 4-foot sides rest the lock nut on the bar; square the uprights with the edge of the board and nail. We now have one 16-foot section complete, except the 12-inch lumber at the bottom is sufficient to prevent the rocks from shifting. This fence is very light, and two men can carry it over any rough ground.

# SKIM MILK GOOD FOR HENS

Cassie Largely Supplies Protein Necessary for Eggs—Also Excellent for Use in Feeding.

Skim milk is one of the very best feeds for both young chickens and laying hens. The casein, or curdy part of the milk, largely supplies the protein necessary for laying hens, while the remaining solids are not inferior to milk for making white, juicy, delicate food. The milk may be fed either sweet or sour, and may be given as a drink or mixed with wheat bran and oatmeal or both.

Feeding Hen with Skim Milk.

# DOULTRY NOTES

During inclement weather fowls are better indoors than out. When the weather is cold, it is best to keep the fowls in a warm, dry place to protect them from the elements.

In an egg of 1000 grains, 600 belongs to the white, 300 to the yolk and 100 to the shell.

Let the children have a pen of bantams. Look up the different breeds at the fair, and buy a pair that attracts you. The pullet or hen which begins to lay in November will usually lay all winter if properly fed, housed, and cared for.

# News of North Dakota

## Telephone Items of General Interest Gathers From All Sections of the Flickertail State.

Under the terms of communication Romington's sentence would have expired Dec. 22, 1921. He was given his liberty by Ward Hallstrom, Dec. 22, 1921. The state board of pardons cancelled his sentence on thirty years. The state law provides for good time deductions from the sentence of prisoners, but specifically and for obvious reasons exempts "fliters."

## CLASH OVER EXPRESS RATES

Fargo and Grand Forks Stage Contest at Railway Board Meeting.

Dismarch—When the railway commission met at Grand Forks Wednesday to consider the question of express rates for the state a lively contest between Grand Forks and Fargo was staged. Grand Forks favored the Interstate Commerce commission, while the Fargo commercial club and its traffic interests opposed such step. The railroads that it discriminates against them.

Reports Standing Rock Starvation Cases. Starvation—Deaths that were caused by extreme destitution on the Standing Rock Indian reservation.

# FORMER WARDEN IS BLAMED

Hallstrom Accused of Freeing Notorious Murderer Without Due Authority.

Fargo—North Dakota had another sensation over Joseph E. Romington, former life prisoner in the state penitentiary for an atrocious murder. The assertion is made that he was illegally liberated by former Warden Hallstrom.

Under the terms of communication Romington's sentence would have expired Dec. 22, 1921. He was given his liberty by Ward Hallstrom, Dec. 22, 1921.

Ward Hallstrom—The former warden of the state penitentiary is accused of freeing a notorious murderer without due authority. This act has caused a great deal of controversy in the state.

Crime Extremely Brutal. The crime for which he was sentenced was extremely brutal and the conviction was most striking. The victim was a young woman who was brutally murdered.

Set Mars At Six Millions. Fargo—Starting out to raise \$1,000,000 for missions, the Disciples of Christ have changed their plans and will endeavor to raise \$6,000,000.

Notice of Mortgage Foreclosure Sale.

Notice is hereby given that certain mortgage executed and delivered by Allan Hester and Louise Hester, his wife, mortgagors, to Brown Brothers State Bank and Trust Company, a corporation, Mortgage, dated the 30th day of November, 1910, and filed for record in the office of the Register of Deeds of the County of Morton, and State of North Dakota, on the 11th day of February, 1911, at 9 o'clock a. m., and recorded in Book 13-11 of Mortgages at page 232, will be foreclosed by a sale of the premises in said mortgage and hereinafter described at the front door of the Court House in the City of Mandan, County of Morton and State of North Dakota, at the hour of ten o'clock a. m., on the 31st day of December, 1913, to satisfy the amount due upon said mortgage on the date of sale.

The premises described in said mortgage and which will be sold to satisfy the same are described as follows: The North West Quarter (NW1/4) of section thirty five (35) north of range eighty nine (89) west of the fifth Principal meridian, Morton County, North Dakota.

The mortgagors having failed to pay three installments Party four (\$44.00), Dollars due November 1, 1911, and Party eight (\$44.00), Dollars due November 1, 1912 and November 1, 1913, respectively, on the mortgage being foreclosed, the mortgagors hereby elect to declare the full amount thereof due and payable, and there will be due on the 1st day of the month of December, 1913, the sum of twenty seven and 80-100 (\$497.80) Dollars together with the statutory attorney's fees and disbursements allowed by law. The mortgagors having failed to pay the interest thirty six (\$36.00) Dollars due November 1, 1911, twenty two (\$22.00) Dollars, due November 1, 1912, and twenty two (\$22.00) Dollars due November 1, 1913, on a prior mortgage on the hereinafter described land, the mortgage herein paid the same, which said amount is included in the amount claimed on the above mortgage being foreclosed, dated the 13th day of November, 1913.

Brown Brothers State Bank and Trust Company, Mortgagee. R. A. Ripley, Attorney for Mortgagee, Mandan, North Dakota. (Legal Advertising.) First publication Nov. 22nd, 1913.

For Fingermarks on Wallpaper. Finger marks on wall paper and other papers. Finger marks on wall paper and other papers. Finger marks on wall paper and other papers.

Daily Thought. The mind that associates inquiries with the transient body is itself inquiring. -Pyth.

Pleasure. The all truly precious things in this world, cannot be bought with money. Contraries. "Poor Jim has an itching for fabric and he has a wife. He has a wife and a wife." -Bridgman's American. Chinese Etiquette. In China all information is handed down by word of mouth. "I have a wife and a wife." -Bridgman's American. Often the Cause. Robinson - "What did you clear by your last speculation?" Smith - "My pocket!" Curling. Curling has been popular in North Britain for the last three centuries and is regarded as a Scottish game. Mostly Men. "Dis - "Has your wife many speaking acquaintances?" Dis - "Not very many; they are nearly all listening ones." -Boeton Transcript.

Truth About It. Many a man who is credited with being wise enough to keep silent, is really growing deaf - but won't acknowledge it.

Proof. "Patric and Flora are devoted to each other." "Are you sure?" "Quite. They use the same powder tag."

Uncle Pennsylvania Says. A feller can't help his kids, but I don't keer to hire any man who's got as idee be's handsome.

Theory and Practice. "Mrs. Growus reads all kinds of learned books on philosophy." "Yet, I dare say she doesn't acquire as much useful information in a month of metaphysical research as Mr. Growus obtains by a few minutes perusal of the stock ticker."

Remarkable Appeal. It is said of the eloquent bishop of Ripon, that he once made the following appeal from the pulpit: "Hearts are a beg of you to take hold of your heart, and look it straight in the face."

Watch the bill grow bigger! From mill to you it doubles in size when you buy of a dealer. Stop Paying Five Profits on Lumber and Millwork

Buy at wholesale - direct from the mill. Pay your local dealer \$400 for lumber, and \$200 of your hard-earned money goes to the middlemen you see pictured above. The mill sells its output to the wholesalers, the wholesalers sell to the jobbers, the commission men and their salesmen buy of the jobbers and sell to the dealers. They all get a good big profit. The local dealer may be a fine fellow, but he's sure to get a big profit off the lumber he sells you. Even if he sold at what is called a low price, you'd still be paying those four other middlemen who don't add one penny's worth of value to the lumber. You're bound to pay far too much for lumber, if you buy from the lumber yard. But there's no need to do it any longer. We enable you to

Save as high as 60% - and get better lumber, too. Our plan is simple. First, we sell you direct - that means one profit instead of five for you to pay. Second, our direct price to you represents one small profit over producing cost. We not only run saw mills, but control the forests. We fell and log the timber, and manufacture it into highest grade lumber. No one else in all America is offering you the chance to buy lumber at such a wonderfully low cost. Immediate shipment - quick delivery. We have millions of feet of lumber in pile, and big water houses full of millwork - ready for shipment. Shipment goes out within 24 to 48 hours after order is received. Seven great millmen sell our shipments to our customers. They track destination within an average of two weeks' time. Now's an ideal time to order while there's snow on the ground for easy handling. We'll furnish free, enough roofing to keep lumber perfectly dry. Satisfaction absolutely guaranteed. We can't lose in dealing with you. We protect the freight. You can't lose in dealing with us before you receive it. You can't lose in dealing with us after you receive it. You can't lose in dealing with us after you receive it. HEWITT-LEA-FUNK CO. (The name is written phonetic)
